Attn: Assistant to Dr. Oppenheimer

Gentlemen:

We are in the process of establishing here a Center for Theoretical Studies, of which Dr. Behram Kursunoglu is Director. It is becoming apparent that we will have to succumb to the bureaucratic practice of keeping an information file on visiting scientists. Dr. Kursunoglu is under the impression that you have a form for gathering such information, and we will very much appreciate your lending us a blank one so that we can use it as a guide.

Sincerely yours,

(ms) Virginia B. Hopkins

CONTINUING EDUCATION SERVICE

April 20, 1966

Robert Oppenheimer
Director
Institute for Advanced Study
Princeton, New Jersey

Dear Mr. Oppenheimer:

It is time to collect information for Volume 13 of The National Compendium of Televised Education. We are asking for your help again this year, and at the same time, expressing our appreciation for your past efforts in our behalf. I would like this year's report to be as complete as possible - representing your organization accurately - in your terms.

As in previous volumes, we need to know the subject areas, the number of classes or sections in each, the enrollments, the grade level, the number of schools, the number of teachers and pertinent information about your ETV development. We need also to know what is being done in televised education for adults.

We are trying, in Volume 13, to get a separate count on enrollments and on the number of students using television for education. For example, each class listed should show the enrollment for that class. At the bottom of the report, a place is provided for the number of students using television in the total televised education activity. Thus, even though enrolled in four classes in each of which the student is counted as an enrollment - thus four enrollments - he will be counted only once as a student.

Because programmed learning has become an important aspect of the use of TV and newer media, we have enclosed a questionnaire for a supplemental report.

Your opinions, suggestions and comments about ETV in your state and over the country generally would be appreciated. Such interchange of ideas and experiences has proved to be very useful.

I know you may not have time yourself, but won't you have someone on your staff give us this information. We will be most grateful.

Sincerely,

Lawrence E. McNamee

"we do not use television"

UNIVERSITY OF THE AIR 14 KELLOGG CENTER

EAST LANSING, MICHIGAN

Thanks to you and to others who have cooperated with us the *National Compendium of Televised Education* continues to be the best source of information concerning development and use of televised education. Persons who are responsible for ETV find that teachers and administrators alike orient themselves to the work at hand by knowing what is being done and learning experiences of others. The *Compendium* provides this.

Richard J. Meyer, Manager of Utilization, Educational Broadcasting Corp., New York, said of the book, "...you have provided something to be found nowhere else in this country. The information found in the *Compendium* is referred to many times during the course of a week."

PLEASE SEND _____ NATIONAL COMPENDIUM OF TELEVISED EDUCATION, VOLUME 12, \$4.00 PER COPY; PREVIOUS VOLUMES AVAILABLE ARE: VOLUMES 8, 9, 10 & 11 AT \$4.00 PER COPY. PLEASE MAKE ALL CHECKS PAYABLE TO MICHIGAN STATE UNIVERSITY.

Dear Mr. Weidner:

Thank you for your letter of September 9th. The Institute for Advanced Study has no overseas programs as such, and I have marked that on your questionnaire. We do, however, invite many scholars from all parts of the world to come here as temporary members. I am enclosing a brief account of the Institute, which may be of interest.

Sincerely yours,

(Mrs. Wilder Hobson)

INSTITUTE OF RESEARCH ON OVERSEAS PROGRAMS

September 9, 1957

Dr. Robert Oppenheimer, Director
Institute for Advanced Study
Princeton, New Jersey

Dear Sir:

An increasing number of institutions of higher education have, in recent years, become engaged in overseas programs. This has led many authorities of higher educational institutions to express a need for a careful review of these new activities.

The Institute of Research on Overseas Programs, under a grant from the Carnegie Corporation, is undertaking a study of the impact at home and abroad of such participation in overseas programs. There are scattered published reports on these programs, but increased participation in overseas projects and problems resulting from such participation rapidly out-dates existing information. Therefore, our first objective is to bring this information up to date and report on new activities. Cataloguing of this information alone may significantly contribute to an increased understanding of the role of American higher education in furthering the development of human and natural resources in other countries and their role in expanding the avenues of communication between America and its neighbors abroad.

We are interested to learn of all contacts of more than one year's duration which your institution has with foreign universities, governments, or other institutions, whether in the area of teaching, research, or technical assistance, and whether the contact is overseas or on your campus.

Attached to this letter is a questionnaire which will serve to identify the programs in which you may be engaged. There is also enclosed for your information a summary description of the project. We will be pleased to send you a copy of the published summary and catalog when it is available. We sincerely thank you in advance for your assistance and cooperation in making this information on your institution available to us.

Sincerely yours,

Edward W. Weidner

New York City, New York

Dear Mr. Milewski:

Thank you for your letter of August 8th. I take pleasure in sending you under separate cover of copy of Bulletin No. 11 which describes the work of the Institute for Advanced Study. In Chapter 3 you will find information about the School of Economics and Politics. As you will see from the Bulletin, the Institute offers opportunities for postdoctorate research to persons whose projects are closely related to the studies currently in progress at the Institute.

I am sorry to say that Professor Earle is not in Princeton at the moment. I shall be glad to bring your letter to his attention, however, as soon as he returns.

I hope this will give you the information you need. If you have further questions, please do not hesitate to let us know.

Yours sincerely,

Milford Mill Jr-Sr High School

January 30, 1951

Dear Miss Williams:

Thank you for your letter of January 26th. Although your enquiry does not appear specifically to apply to this Institute, I am sending you in this letter and the enclosed bulletins what information we have available.

The Institute for Advanced Study is an institute for post-doctoral research only; we have no courses of instruction; and membership is by special appointment of the Faculty and the Director to scholars of rank who have the Ph. D. degree, and who are prepared independently to undertake a specific project of work which falls within the scope of the activities of either of our two schools: Mathematics and Physics, or Historical Studies. A few memberships with financial support are offered each year to scholars in this country and abroad.

We do not have a catalogue, nor have we published an up to date bulletin of the Institute; but I am sending you our first bulletin which describes the organization and purpose of the Institute, and a brief memorandum, which I hope will be of some help.

Sincerely yours,

Katherine Russell,
Secretary to the Director

Miss Emma E. Williams
Milford Mill JR-SR High School

MILFORD MILL JR.-SR. HIGH SCHOOL
3800 Washington Avenue
Baltimore 7, Maryland

January 26, 1951

Director of Admissions
The Institute for Advanced Study
Princeton, New Jersey

Dear Sir:

As a counselor in Milford Mill High School which has a student body that will approach 2000 in 1952, and as an employee of the Baltimore County School system of Maryland, I am attempting to compile data on available scholarships open to Maryland students in Maryland colleges and colleges of neighboring states.

While material on scholarships is available, much of it is general. I am interested in compiling this material to be of a specific nature to all Maryland students. We are all aware that each year many scholarships are unused, but the reason for this lies in the ignorance of the kinds of scholarships and where they are to be found.

I will appreciate information on the 1) The Name of Scholarship, 2) The number of scholarships available in this category, 3) Conditions under which the scholarship is offered, 4) The Amount of money involved in the scholarship, 5) and the Procedure of securing scholarship on the following types of scholarships if they are offered by your school:

1. General Competitive Scholarships
2. Competitive Scholarships in Special Fields
(such as music, education, language, science, engineering, law, medicine, architecture, agriculture, home economics, nursing)
3. Scholarships of Special Organizations
(such as Daughters of American Revolution, Kiwanis Clubs, Masons, etc.)
4. Special Scholarships to Daughters and Sons of Ministers, Educators, etc.
5. Scholarships to Orphans
6. Scholarships open to Special Sections of the Country
(such as for certain schools in Maryland, certain counties in Maryland, or for state of Maryland in general)

Director of Admissions -2-

7. Scholarships open to members of Special Religious Denominations
(such as Methodist, Catholic, Lutheran, etc.)
8. Scholarships open to highest ranking Senior in a school
9. Scholarships open to Foreign Students
10. Scholarships open to members of the Armed Forces
11. Service Scholarships
(such as for work done by the student)
12. Scholarships to relatives of Specific Families
13. Scholarships to members of certain clubs
(such as 4-H, etc.)
14. Scholarships to children of Employees of Specific Companies
(such as Standard Oil, etc.)
15. Other types of Scholarships Not listed Above

I shall be very grateful for any information that you are able to furnish to me that will be valuable to the students in Maryland Schools. I shall appreciate, too, a copy of your current Catalogue and the placing of the name of our school on your permanent mailing list.

Sincerely yours,

Emma E. Williams

Wed Aug 6 1947
Fox Point, Lake of Bays
Ontario, Canada.

Dear Professor von Neumann:

I write to you to tell you that I have accepted a position at the University of Rochester starting this fall. It was either a case of taking the position now or leaving it, and as some permanency was involved I felt that it was better to accept. Whereas no leave could be given this fall, Rochester did promise to do everything possible to grant a year's leave one year from this fall in case any arrangement could be made to study at Princeton. I certainly regret very much having to miss such a fine opportunity this year, and can only hope that something similar may turn up next year.-- I appreciate very much all that has been done for me.

Yours sincerely,

(Signed) Donald S. Miller

Yale University
New Haven, Connecticut

Dear Mr. Miller:

Your letter of April 22nd was handed to me since I am handling the housing for Institute members. I cannot say at this moment whether there will be an apartment available for you but if you will fill out the enclosed form, I shall be glad to put you down on the list and to notify you some time during the summer whether we will have an apartment available for you or not. If we cannot fit you into one of our Institute apartments, it is just possible that we may be able to find accommodations for you elsewhere in Princeton. You may expect to hear from me fully about that as soon as the situation is clear. I am confident that we can take care of you from the first of July to the twentieth of August. After the latter date, the question will depend on the requirements of the members of the Institute whose applications precede yours.

Yours sincerely,

Bernetta A. Miller
Director's Office

THE INSTITUTE FOR ADVANCED STUDY

Founded by Mr. Louis Bamberger and Mrs. Felix Fuld

PRINCETON, NEW JERSEY

The Institute for Advanced Study submits the following research proposal to the Office of Naval Research. (It is suggested that this research be undertaken as a task under contract N6ori-139 between the Institute for Advanced Study and the Office of Naval Research.)
University

1. The Problem: Research in Linear Operators
2. History: Donald S. Miller^{*} has been working on the spectral theory of operators in general Banach spaces during the last year. He wants to continue this work.
3. Proposed work: Professor John von Neumann of the Institute for Advanced Study feels that the problems of this field are important and that Dr. Miller is well qualified to carry out research in this direction.
4. Scientist in Charge: John von Neumann
5. Methods: Cooperation in Research between D. S. Miller and J. von Neumann
6. Duration: One year
7. Budget

Miller, Harold W.

May 18, 1945

Professor Harold W. Miller
Furman University
Greenville, South Carolina

Dear Professor Miller:

Your application for membership in the Institute for Advanced Study was most sympathetically discussed by the Faculty of the Humanistic School today. I have been asked by the members of the Faculty to suggest to you that the ideal place for your work would be in Sigerist's Institute in Baltimore where you would find the books which you need and where you would have the advantage of consultations with Dr. Ludwig Edelstein. The members of the Faculty inform me that in Princeton you would not find the materials which you need and there is nobody here whose work very closely coincides with your field.

I suppose if you want to Baltimore you would need some financial assistance. I do not know whether anything of the kind could be obtained from Johns Hopkins but I should like to raise the question whether it might not be worth your while to try for a Guggenheim Fellowship.

The members of our Humanistic School are much interested in your plans and believe that suggestions along the line I have indicated would best further them. If in the future your program of research is such as to touch more closely the work being done at the Institute, we should be glad to consider another application from you.

With warmest good wishes, I am

Yours sincerely,

Frank Aydelotte

intro/notes*

FURMAN UNIVERSITY
FOUNDED 1826
GREENVILLE, SOUTH CAROLINA

23 April 1945

Dr. Frank Aydelotte
The Institute for Advanced Study
Princeton, N. J.

Dear Dr. Aydelotte:

I am writing to make application for admission to the School of Humanistic Studies for the year 1945-46, to continue research in Greek Literature.

The following is an account of my formal training in Classics. I am a graduate of Wofford College with the B.A. degree (1931) and of Duke University with the M.A. (1932) and the Ph.D. (1935). My undergraduate training included six year-courses in Greek and five year-courses in advanced Latin. At Duke, I was Scholar in Greek for one year and Fellow in Greek for two years. My graduate major was Greek, with the minor in Latin; my graduate training included considerable work in epigraphy, inscriptions, archaeology, and linguistics, as well as language and literature. My chief instructors at Duke were Dr. Charles W. Peppler, Dr. Vernon E. Way, and Dr. Andrew R. Anderson. During the year 1937-8, I attended the seminar in Pre-Socratic Philosophy conducted by Dr. Harold Cherniss at the Johns Hopkins University. Since September, 1938, I have taught Greek and Latin at Furman University.

Since the completion of my graduate work, I have carried on research in Classics as continuously as my teaching permitted. The last six summers have been devoted to research at Harvard University, especially in the field of Greek Tragedy and Comedy, in which I have been particularly interested. On a separate sheet I give a list of papers which have been published.

I should like to study next year several treatises of the Hippocratic Corpus, in which I have been interested for some time. Beside the better known treatises of the Corpus, there are a number which are vitually unknown. In so far as time allows, I wish to examine the treatises Prorrhetic II, Glands, and Diseases I, in order to determine, if possible, their probable filiation, authorship, relationship to the other treatises of the Corpus, and date or period of composition. To do this, it would be necessary to study the medical ideas and doctrines, to determine the degree to which they are consonant with Hippocratic or Cnidian doctrines; the philosophical ideas expressed would also be examined, since early medicine and philosophy were not separate. The style of the treatise, as well as the vocabulary and syntax, would need to be examined for internal evidence concerning the dating of the treatise. The study would include, wherever necessary, critical emendation of the text.

FURMAN UNIVERSITY
FOUNDED 1826
GREENVILLE, SOUTH CAROLINA

Since Furman University does not at present have the system of the sabbatical year, I would not receive compensation during a year's leave of absence from this institution. I am able to bear myself part of the necessary expenses of a year's research, but not all. I should like to request, therefore, that you consider whether it may be possible for the Institute to extend to me some financial aid.

If there is further information which you may need concerning my training and experience, I shall be glad to furnish it.

Sincerely yours,

Harold W. Miller

Institute For Advanced Study
Princeton, N.J.

Dear Sirs:

I should greatly appreciate it if you would send to me
a copy of the latest bulletin of the Institute.

Would you also please inform me as to whether Dr. Capps
is to be associated with the Institute next year, and
whether he will conduct seminars in either Greek Tragedy
or Greek Comedy.

Sincerely yours,

Harold W. Miller

Dr. Frank Aydelotte
The Institute for Advanced Study
Princeton, New Jersey

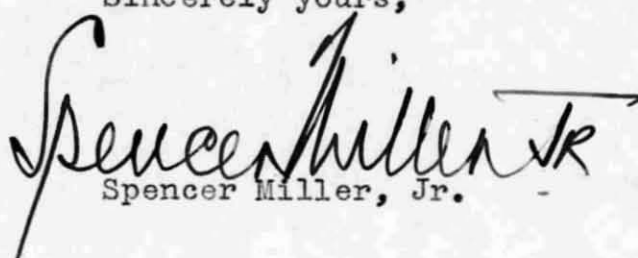

Dear Dr. Aydelotte:

Thank you for your letter of
October 2nd.

I can quite understand the posi-
tion of your faculty on the proposed
Bamberger Memorial Park. If the project
goes through, we might discuss the idea
again of some relationship of the Institute
to this cultural center.

In the meantime, I do appreciate
your generous words of approval of the
idea. With high regard.

Sincerely yours,

Spencer Miller, Jr.

SM:MTS

October 2, 1944

Spencer Miller, Jr., Esq.
217 Turrell Avenue
South Orange, New Jersey

Dear Spencer:

The Faculty discussed today most sympathetically your proposal for a cultural center on the Bamberger Estate in South Orange. At the same time the members of the Faculty were unanimous in feeling, as I expected they would be, that there is no sincere way in which the Institute could be associated with the project. We are not really equipped to give popular lectures of the type that would be useful to such a cultural center and to make an effort to do so would really take time and tend by just so much to nullify the effects of the work which Mr. Bamberger has endowed here. For that reason I am afraid you must leave the Institute out and make it a project for South Orange and the adjoining boroughs. We all think it a delightful idea and wish you complete success in realizing it.

Yours sincerely,

Frank Aydelotte

Miller, William

THE INSTITUTE FOR ADVANCED STUDY
PRINCETON, NEW JERSEY

OFFICE OF THE DIRECTOR

November 26, 1948

Dear Mr. Miller:

Dr. Oppenheimer has asked me to thank you warmly for sending him a copy of the bill enacted July 27, 1948 regarding the amendment to the New Jersey inheritance and estate tax law. He had not known that it was finally passed and signed. He appreciates very much your courtesy in keeping him informed in the whole matter.

Yours sincerely,

(Mrs. John D. Leary)
Aide to the Director

Millikin, Donald

August 27, 1946

Mr. Maxwell Fassler, Personal Consultant
New York City Veterans Service Center
500 Park Avenue
New York 22, New York

Dear Mr. Fassler:

Thank you for sending us the interesting resumé of Mr. Donald D. Millikin's experience in cryptanalysis. I regret that no work in this field is being pursued at the Institute for Advanced Study and that consequently we have no opportunity to offer Mr. Millikin. I am returning his curriculum vitae herewith since you may wish to use this in helping Mr. Millikin find the position which he is seeking.

Yours sincerely,

Frank Aydelotte
Director

Princeton, University
Princeton, New Jersey

Gentlemen:

Enclosed herewith you will find a resume and historical outline of Mr. Donald D. Millikin, formerly a Major in the United States Army.

Mr. Millikin is presently unemployed. In view of his excellent background in Cryptography and Cryptanalysis, we thought your organization might be interested in contacting him.

Should you desire further information about Mr. Millikin, we suggest you write to him at 145 Kennedy Avenue, Hempstead, New York.

If we can be of any further service to you, please let us know.

Yours very truly,

Maxwell Fassler

Maxwell Fassler
Personal Consultant

Dear famc. If any reply is necessary one should say, that Cryptanalysis is not a field covered at the Institute, and the enclosed report on Mr. Millikin is accordingly being returned with thanks

Clarence Pickett, Esq.
American Friends Service Committee
20 South Twelfth Street
Philadelphia 7, Pennsylvania

Dear Clarence:

I have now got far enough through my mail to find your letter of July 18th about George Fort Milton. I am going to New London on Monday to be away the rest of the month. If he could come to see me some time in September, I should be very glad to talk with him though I am dubious about there being any opportunity for him here at the Institute.

Yours sincerely,

FA:jsr

Frank Aydelotte
School for Advanced Studies
Princeton, New Jersey

Dear Frank:

George Fort Milton, who has done a good deal of newspaper editorial writing and is now on the St. Louis Post Dispatch, is really interested in more solid research and writing on political subjects. You may remember that he wrote the book on Presidential powers, a historical study. He is leaving the Post Dispatch and he wants to talk with you about the possibility of some academic connection.

I haven't encouraged him very much in thinking that the School for Advanced Studies could use him, but I do think that if you could see him sometime, it might be worth your while. When you get back from England you will find this letter waiting for you, and if you see a chance, either to see him in Washington or Princeton or New York, will you please let me know?

Very sincerely yours,

Clarence E. Pickett
Executive Secretary

CEP :mf

September 14, 1940

Dear Mr. Buell:

I have talked over your letter concerning George Fort Milton with several people here and regret to say that there seems to be no possible opportunity for him at the Institute for Advanced Study at the moment. If any opening should occur in the future I shall not fail to keep him in mind.

Yours sincerely,

FRANK AYDELOTTE, Director

Dr. Frank Aydelotte
The Institute for Advanced Study
Princeton University
Princeton, New Jersey

Dear Dr. Aydelotte:

I am writing to inquire whether you might have an opening some time in your American History Department for Mr. George Fort Milton. He has been a distinguished Southern editor but for financial reasons has been obliged to give up his paper in Chattanooga, Tennessee.

I have long believed that Mr. Milton is more at home in the field of history than in editorial work. He has published two distinguished books; one of which is the best life of Stephen Douglas I have ever read, and another (whose title I forget) which deals with the Andrew Johnson period.

He is a rich personality. He would be an extremely stimulating teacher, with ideas in many fields, and whose scholarly output would be large.

If there is an opening at the Institute I would be glad if you could keep him in mind.

Sincerely yours,

Raymond Leslie Buell

To

The Registrar or The Manager
Institute for Advanced Study
Princeton. J. N.

Dear Sir

I have heard a little, read a little
about your remarkable Institute.
I have met Dr. Ranganath our able
exponent of Library Science who has
visited your Institute.

Dr. Ralph Purcell the vice consul
for U. S. A. in Bangalore has also queried
me a few particulars, but I am very
desirous of knowing more about
your organisation.

By training, I am an Engineer
but I am keenly interested in Science
in general. I now & then meet
wealthy Indian friends (business
men) and have chats about
founding Institutes. I try & tell
them about your Institute and other
Institutes in U. S. A. which I
have visited before the War.

It is for this reason
that I now make
a request.

Is it possible for you
to kindly spare for my
use a brochure, or a folder
or a booklet or a booklet
telling us how it all started
and grew up and who are
now residing there. I
would feel most grateful.
I hope I am not troubling
you too much. A reply at your convenience
will be much appreciated.

Yours faithfully
A. H. Mirza

P.S. Is it true that all the walls
are mostly blackboards so that
a Scientist can write his idea
or equation straightaway the
inspiration comes to him?

Molnar, E. F.

May 8, 1947

Dr. E. F. Molnar
1766 Seventh Street West
Calgary, Alta., Canada

Dear Dr. Molnar:

Dr. Aydelotte has asked me to thank you for your letter of May 6th and for the two copies of the pamphlet "Common Daily Wakefulness and God." He has also asked me to say that at first sight the material of the pamphlet seems to lie outside the present program of the Institute for Advanced Study but he will be glad to give the subject thoughtful consideration.

Yours sincerely,

Jane S. Richardson
Secretary to Dr. Aydelotte

1766 7 Street West
Calgary, Alta.,
May 6th, 1947

The President
Institute for Advanced Studies
Princeton, N.J.

Re: Insertion of studies of cer-
tain properties of wakefulness
in the program of the Institute

Dear Sir,

Scholars have accepted wakefulness as "granted" for the past many thousands of years. This simply criminal shortsightedness, on the part of scholars, has been directly responsible for the ever growing threat of chaos, of juvenile delinquency, in the various countries of the world.

I am most humbly suggesting, once more, the urgent and immediate insertion of a study of the nature and properties of wakefulness, in the program of the Institute.

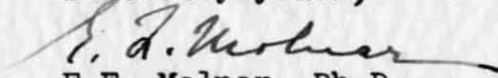

This modest suggestion is fully supported by the enclosed report which should be studied in a calm and objective way. It may be considered as a nearly complete index of the problems involved.

Furthermore, I take the liberty of calling your kind attention to the work of Prof. R.A. Wilson, University of Saskatchewan in which the author has fully confirmed, in an independent way, the conclusions of the enclosed report with regard to the emerging of language. This work has been published now by the British Publishers Guild as Guild Book No 213. Bernard Shaw when prefacing this work, stated:

"This book by Professor Wilson is one in which I should like everyone to be examined before being certified as educated or eligible for the franchise or for any scientific, religious, legal, or civil employment.

Shaw has never written a truer sentence than the one quoted above. The same is true also for the humble suggestion contained as the subject-matter of this communication.

Sincerely yours,

E.F. Molnar, Ph.D.,

Encl. 2 copies of report on Wakefulness.

January 11, 1946

Reverend E. F. Molnar
1766 - 7 Street West
Calgary Alta., Canada

My dear Dr. Molnar:

In Dr. Aydelotte's absence on the Palestine Commission, I am writing you concerning your letter of January 7. Dr. Aydelotte will be away for several months and so will be unable to see you. I might add that I find your pamphlet interesting, but it is unlikely that the Institute would add a speculative field of this type to the fields which it is already committed to develop.

Very truly yours,

MM:MGH

Application for a post

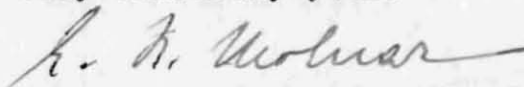

Dear Sir,

I take the liberty of enclosing herewith a copy of my NEW APPORACH which contains on pp. 30-37 a vital contribution to philosophy.

I am wondering whether you could offer me a post in your Institut. My special line is interpretation of reality and of Kant together with the Neo-Kantian trend of thought.

I would be glad to have a personal interview with you. Kindly give me a date when I could see you in connection with my application for a post in your Institut. I thank you!

Very sincerely yours

/Rev./ E F Molnar Ph.D. /Klausenburg, Transylvania/.
Hungary

Montagu, M.F.A.

May 13, 1943

Dear Professor Montagu:

Many thanks for your letter of May 1st and for this impressive bibliography. I sympathize with you deeply in the situation in which you find yourself and hope that when the war is over you may be able to find a more satisfactory position. It is, of course, always the case that a man who takes a new line and does not fall into a conventional niche has, so to speak, to create his own opportunities. That is difficult to do in war time but ought to be possible in time of peace.

With warmest good wishes, I am

Yours sincerely,

FRANK AYDELOTTE

DEPARTMENT OF ANATOMY

1 May 1943

Dr Frank Aydelotte
The Institute for Advanced Study
Princeton New Jersey

Dear Doctor Aydelotte:

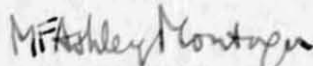

Many thanks for your letter of 28 April in reply to mine.

I perfectly understand your situation, and hope that all your best hopes for the Institute will be realised. My own letter was something of a shot in the dark, or rather, a reaching out in the dark, for at the moment I feel very much like a drowning man without the least hope of ever landing anywhere. I have thus far been tolerated in medical schools only because I have some "advertising value," otherwise no one has the least interest in my work, still less in supporting it. As a result I am suffering from pernicious academia, a harrowed soul, and a psychological state which cannot be described as altogether happy. The cure for these various disorders is to stick to anatomy, which I am paid to teach and do research in, or really make a position for myself somewhere where I shall be able to do what I have been equipped to do, and which, in this world, so badly needs to be done. Professor Frank Speck, head of the Department of Anthropology at the University of Pennsylvania is intimately acquainted with the work I have been doing since my establishment in Philadelphia, and I know that he would be glad to speak about the character of that work.

Under separate cover I send you a bibliography of my writings up to August 1941. You will notice a tremendous number of reviews. I have always been a great reader, and since I have always made notes on my reading editors have found it of value to reproduce them in the form of reviews. I send you the latest issue of ISIS as a sample of this side of my activities.

Herewith I enclose an announcement of my latest book.

Ever yours sincerely,

M F Ashley Montagu
Associate Professor of Anatomy

Incl. you.

March 28, 1963

Dear Mr. Montes:

Thank you for your letter of March 18th. We sorry to tell you that we have no summer session and that the Institute has no regular teaching staff in languages or any other subject. We are sorry we cannot help you, but wish you success in your endeavor.

Sincerely yours,

(Mrs. William Grander)
Office of the Director

*re George Montgomery
(See Miss Miller)*

September 7, 1944

To Dr. Aydelotte

From B. A. Miller

Report on George Montgomery's well

The well was thoroughly cleaned and disinfected by John and George. There is plenty of water there.

The water has been analyzed by the Boro Engineer's Office (Mr. Riker)

It does not any where near pass the test for drinking, nor has it or will it according to Mr. Riker. He thoroughly condemns it.

He suggests that we seal the pump and put a sign on it CONDEMNED.

I do not think this is quite right, as it is fit to wash with, I'd say.

Should we say "CONDEMNED, NOT FIT DRINKING WATER"?

We are still carrying water to George for drinking.

Shall I write another letter to him telling him that we can no longer supply drinking water and again advise him to try to find a place to live.

TO FIND A PLACE FOR HIM TO LIVE IN PRINCETON IS HOPELESS.

The colored people are trying desperately to rent vacant stores to live in per Howe and Co.

I am afraid that there may be an effort to get him in the house at the end of Olden Lane. We should be fortified against this, either by letting it to some other person or quickly demolishing it.

Shall I inform George that hereafter he will have to carry his own drinking water?

George Montgomery data re well, etc.

will be filed in my file under

"RENTAL PROPERTIES"

Moore, A. D.

April 3, 1950

Dear Mr. Moore:

Thank you for your letter of April 1st and your good offer to give a demonstration of your fluid mapper techniques at the Institute. Dr. Oppenheimer asked me to make enquiries of our group here to see whether they would wish us to arrange for a special lecture. The members of our group who would be most interested have suggested that it is perfectly convenient for them to attend your lecture at the RCA Laboratories, and that it would not be necessary for you to come specially to the Institute, and to take time to give another demonstration. We will come in touch with RCA to learn the time scheduled for your talk. We do appreciate your thoughtfulness in telling us of your proposed visit to Princeton.

Sincerely yours,

Katherine Russell,
Secretary to the Director

Dr. J. Robert Oppenheimer
Director
Institute for Advanced Studies
Princeton, N. J.

2505 E. Eng.
April 1, 1950

Dear Dr. Oppenheimer:

The new devices I have called "fluid mappers" are used for making fluid flow visually simulate magnetic and other fields. If you happened to see my paper, Fields from Fluid Flow Mappers, in the August 1949 issue of the Journal of Applied Physics, then you already know something about them. The cover of that issue, you may remember, pictured one of my simulations of the field in a triode.

If you would wish it, it might be possible to arrange for showing or demonstrating fluid mapper techniques at the Institute. As indicated in the enclosures, I have been arranging to give a series of Fluid Mapper Programs in April. The Programs arranged for so far are as follows:

- Friday April 7 - Reliance Electric & Engineering Co., Cleveland
- Monday 10 - National Bureau of Standards
- Tuesday 11 - U. S. Naval Ordnance Laboratory
- Wednesday 12 - RCA Laboratories, Princeton

The RCA people have not told me the time they have in mind for that Program, but I assume it will be morning or afternoon. At this moment, and subject to the possible scheduling of a New York area Program on Thursday, it looks as if a Program for your Institute (contributed, no charge) could be given Wednesday evening or sometime Thursday.

The full Program is a two-hour affair; but the content is extremely flexible. At the Institute, I would adapt to any time limit you would set, and present the things you would most like to see. In any case, I would want to operate a couple of the fluid mappers I bring with me. These fluid flow simulations are superbly beautiful, and every scientist who ever sees them loses his soul to them at once.
be glad

For my part, I would/to give any or all of the Program at the Institute, to as few or as many as would wish to attend. (Excuse my typing errors - our secretary is snowed under this week.)

-2-

Mr. C. N. Hoyler at RCA is arranging details for me, for the RCA Program. If you are interested, you might best call him to verify the time for that program. Then, if that leaves the evening clear, a Wednesday evening Institute Program would be that much closer to being settled.

I will probably leave Ann Arbor Thursday evening, April 6, and it would be well to hear from you safely before then. Or again, I could be reached the next Tuesday through a phone call to the office of Ralph Bennett, Director, U. S. Naval Ordnance Laboratory at White Oak.

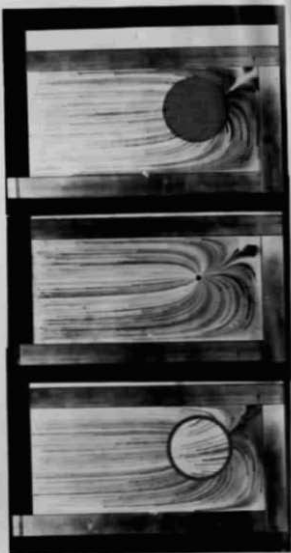

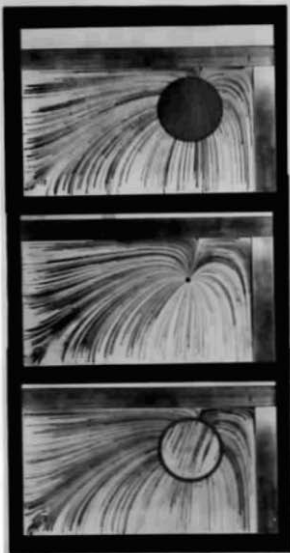

Sincerely yours,

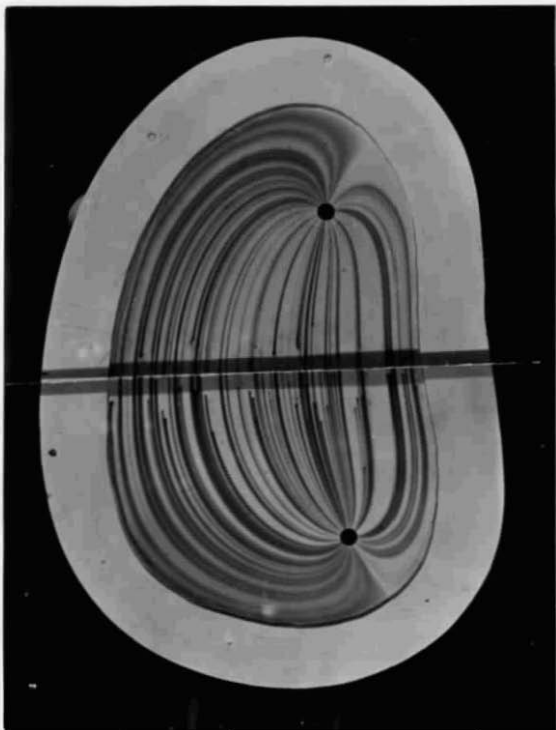

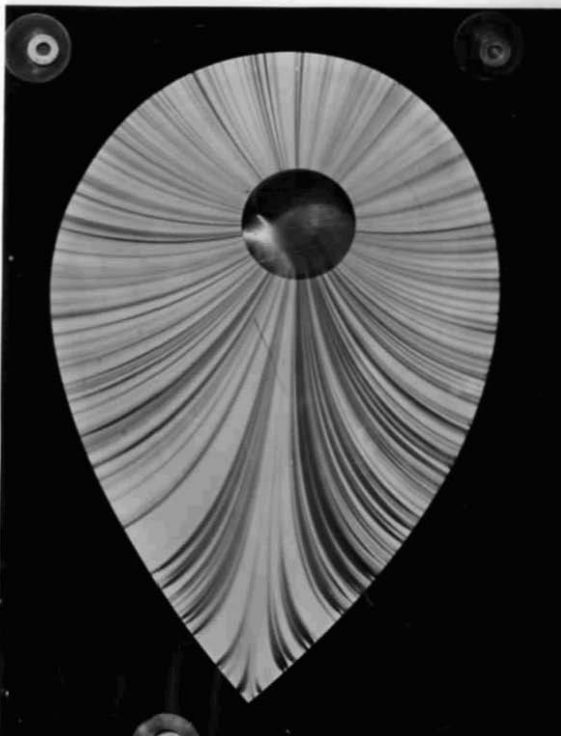

A. D. Moore

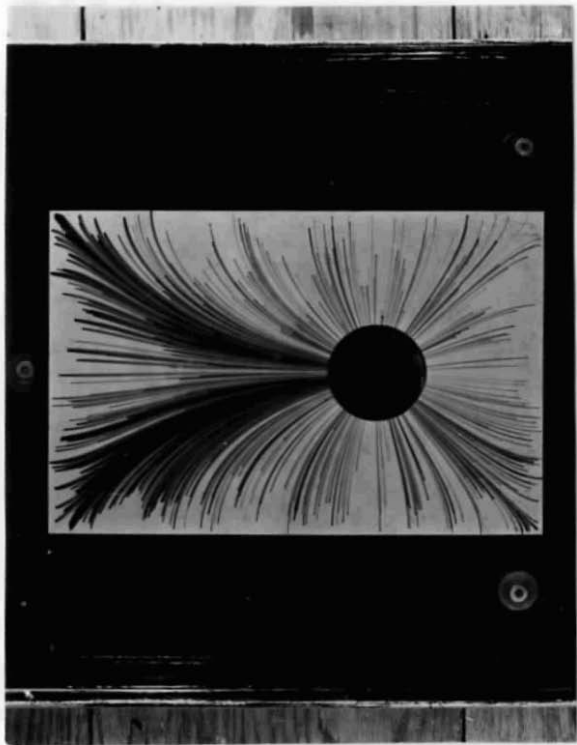

P. S. For good measure, I'll include a print, numbered 7,- one of the latest jobs. I have written a tentative paper on some possibly new electromagnetic propositions, and No. 7 shows fluid mapper verifications of the propositions. Have submitted the manuscript to Smythe of CalTech for comment.

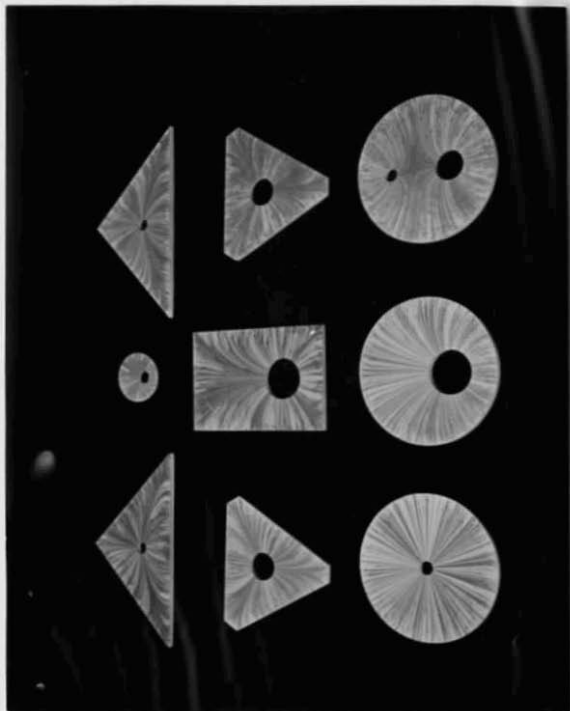

ADM

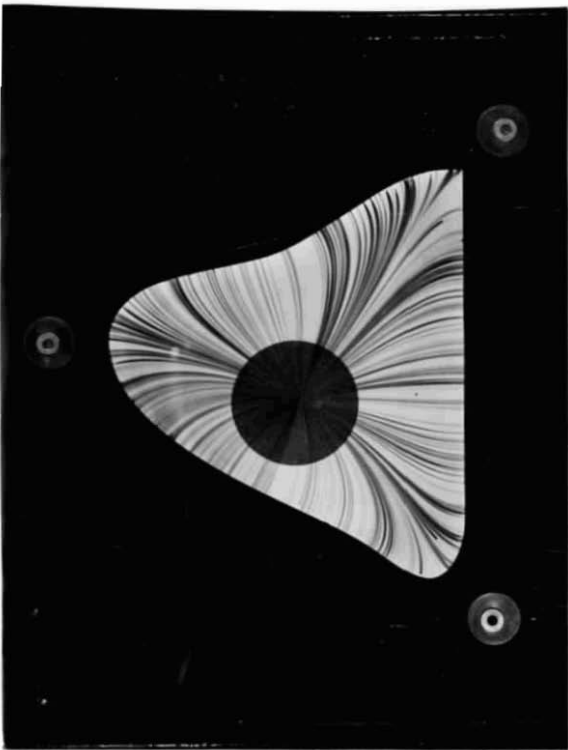

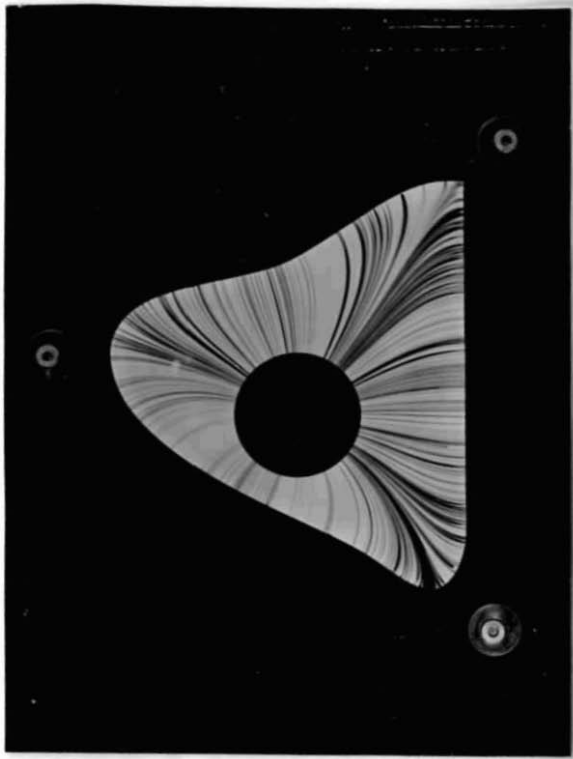

Advance notice of a proposed series of -

FLUID MAPPER PROGRAMS

April 8-15, 1950

Description of Fluid Mappers. Fluid mappers are still so new that many are not yet well acquainted with them, even though an extensive paper - "FIELDS FROM FLUID FLOW MAPPERS" - was published in the August 1949 issue of the Journal of Applied Physics. Before describing a fluid mapper program, the mappers had better be described. To help in this, six numbered prints are included.

numbered on backs of prints

In general, a fluid mapper is a device for making confined streamline fluid flow visually simulate (and furnish the first step in the solution for) any one of a great variety of field situations. The three main types can be listed as:-

1. Slabs without sandbeds (Fig. 1 5)
2. Slabs with one or more sandbeds (Fig. 6)
3. Isolated sandbeds (No print included herewith)

About 50 years ago, Hele-Shaw did a splendid pioneering job in England, making fluid flow between two parallel glass plates simulate magnetic fields. He modified his thin flow space at will, by applying paraffin to one plate and scraping it down to desired thicknesses. But Hele-Shaw's work died for half a century, apparently due to inflexibility of his techniques.

The writer has devised techniques having simplicity, cheapness, and great flexibility, by developing the use of artificial stone (dental stone) for the lower of the two plates. The slab is given a flat face by casting it on plate glass.

If the molds are already at hand, many simpler slabs can be put into the operating tray and operated in about one hour after starting to make the slab. Larger slabs cost less than a dollar. Smaller slabs can be made for ten cents.

In Fig. 1, a simple slab operates with an open edge. The upper plate is invisible. The slab and well boundaries are isopressure lines. It is a two-dimensional case. Given like boundaries, this flow pattern, together with its orthogonal system, is simulating an electrostatic field; a magnetic field; a heat conduction field; current flow in a conducting sheet; eddy currents in a plate due to flux changing through the well or hole; or, a chemical diffusion case.

The record slabs, Fig. 2, also were all operated open-edge. The lower right slab had two sinks. Any number of sources and sinks, of any shape, may be used.

One of several very recent developments is the technique for making "record slabs." Within a matter of minutes, the face of a slab is prepared, it is operated, and the flow pattern is permanently recorded on the face. The record slab technique will save time and eliminate photography, in many cases.

A closed-edge case is shown in Fig. 3. Fluid flow is confined within the boundary. There is one source, one sink, and they are equal. Using recently developed techniques involving reversed flow and double exposure photography, sharp lines were obtained throughout the flow area. These flow lines simulate (for example) the equipotentials of the magnetic field due to equal and opposite currents within an iron enclosure of infinite permeability.

At this point, it is well to say that all such flow patterns can be completed by simple mapping routines; and by means of arithmetic only, numerical solutions are obtained.

After mapping a copy of Fig. 3, the area within the left singular point loop was blown up to scale, and a new slab, Fig. 4, was made. This slab, dated 2-18-1950, represents the first time such a blow-up job has been done with fluid mappers.

Figs. 3,4 and 5 represent recently perfected techniques for casting a slab, by simple methods, with any boundary shape desired.

Fig. 5 also leads up to the sandbed idea. A screen is mounted horizontally, about halfway down the central well. The screen is present in Fig. 5, but is not there in use.

The "sandbed" feature, invented by the writer in 1943, was devised for the purpose of visually simulating and solving for the often extremely difficult cases that are involved with distributed sources or sinks. In Fig. 6, shotted metal granules (rather than the sand originally used) has been filled in on the screen, to be exactly level with the slab face. It is a uniformly permeable, high-resistance bed. Therefore, fluid is forced to appear (or disappear) uniformly over the sandbed area.

Fig. 6, if you like, is solving for an electrostatic case, the inner charge being a uniform space charge. Several other interpretations are possible.

The isolated sandbed form of fluid mapper (a sandbed with no slab surrounding it) simulates a number of difficult field situations. It also can be made to solve for torsional stresses in shafts of arbitrary section - thereby offering a way around the difficulties inherent in using the soap film analogy.

It should be noted that certain three-dimensional cases having cylindrical symmetry can be handled by fluid mappers.

Fluid mappers are the only practicable devices we have so far, not only for visually simulating these field phenomena, but also for readily leading to solutions of cases beyond the reach of mathematics.

- They are certain to revolutionize field mapping.
- Their teaching impact has already been proved to the point where we can say their adoption for teaching is inevitable.
- Their implications for research and application work are very broad.

Past Programs. The writer has given a fair number of fluid mapper programs. In April 1949, demonstrations were given at:

General Electric at Schenectady
Bell Telephone Laboratories (twice in a day, at Murray Hill and at West Street)
Westinghouse Electric, Research Laboratory
Union Switch & Signal, Swissvale
Reliance Electric & Engineering, Cleveland

A total of 500 engineers and scientists were thus covered. Three days of demonstration were given at Troy last June, for the Visual Aids Exhibit, A. S. E. E. Convention. A program was given in December to the Industrial Mathematics Society of Detroit. An intense degree of interest is invariably aroused.

Reprints. Due to the programs given, and to the paper's publication, over 200 reprints have had to be sent out. Requests have come from workers whose fields of interest cover a very broad range.

Continued Development. As indicated above, intensive development of fluid mapper techniques has continued. Earlier techniques have been simplified or improved. A number of important new techniques have been devised and proved in. Also, many color slides of the beautiful flow patterns have been made. Thus, the proposed programs will have some new things to offer.

Fluid Mapper Program. Two hours should be allowed, - morning, afternoon, or evening. During the first hour, a full demonstration of casting and operating a slab is carried out. Intermingled with this, while plaster is setting, the slides are shown - some on slab-making techniques, others of fluid flow patterns of diverse kinds.

In the first part of the second hour, discussion is held; many questions always arise. Some questions are answered at once. Others are held over to the second part of this hour, to be covered by fluid mapper demonstrations made close-up, for those who wish to come forward. Still others, of a more individual nature, are covered by consultation: during the visit, the writer will be glad to use as much time as is available, consulting as to fluid mapper techniques or applications.

Audience, Selection. At educational institutions, invitations should go to the staffs in E. E., Aero, Eng. Mechanics, Chem. Eng., M. E., Physics, at least. Interested students, especially graduates, welcomed.

In companies, those working with electrostatic fields, magnetic fields, eddy currents, Foucault currents, heat flow in solids, fluid mechanics, torsional stress analysis, electrolytic tank methods of solving for fields, and diffusion, should be covered.

Audience, Size. Anywhere from 50, to approaching 300. For showing fluid mapper operation to the audience while still seated, a tilted mirror and spotlight are brought along with the equipment.

Tentative Itinerary. It is hoped that during the coming Spring Vacation, a trip can be arranged so that two or more programs can be contributed to institutions, and about four can be paid for by companies. The schedule might be:

April 8, Saturday, Carnegie Institute of Technology, contributed.
April 10, a company.
April 11, Naval Ordnance Laboratory, contributed.
April 12, 13, 14, companies in the East.
April 15, possible as a contributed to an Eastern institution.

Financing. Each company will pay a stipend of \$100.00, plus its fraction of the total trip expenses (the expenses might roughly be guessed at \$200.00). That is, the companies would finance everything. They will be billed after the trip. There would be no charge of any kind to an institution.

Facilities. A few buckets, some water-filled, are needed. Two, and preferably three tables, would be used. A good projector with a high-wattage lamp, for 2-by-2 slides is a "must." A blackboard, fixed or portable, would be appreciated. If other needs develop, they can be covered later.

Patents. The writer could undoubtedly secure a number of patents of engineering and scientific import, on fluid mapper developments. Instead of applying for such patents, it is the writer's policy to encourage the earliest and widest adoption possible, for fluid mappers.

Moore, Edward F.

February 23, 1948

Dear Mr. Moore:

In answer to your note of the 20th, the article to which you refer mentioning the endowment of the Institute is probably that published by Life Magazine in their December 29, 1947 issue. You will most likely be able to obtain a copy by contacting the Courtesy Department of Life in New York City.

Yours sincerely,

Katherine Russell,
Director's Office

Mr. Edward F. Moore
80 Broadway
New York 5, N. Y.

EDWARD F. MOORE
80 BROADWAY
NEW YORK 5, N. Y.

February 20, 1948

The Secretary
Institute for Advanced Studies
Princeton, N.J.

Dear Sir:

Assuming that the amount of your endowment is public information, will you please favor me with an approximation of the value of this fund? I wish to determine whether your Institute is the Foundation which was reported in one of the New York papers early in January as providing a house for certain eminent thinkers, at Princeton. If you happen to recall the article referred to and have a clipping handy, will you please give me the reference as to the name and date of the paper in which it appeared? I was told that the article referred to a twenty-seven million dollar endowment fund.

Thank you.

Yours truly,

Edward F. Moore

EFM/cm

Just Gen Moorehouse

5/17/62

Call from Mr. Moorehouse, who lives in Princeton. Says you may not remember him, he was a member of an ad hoc committee on AEC relations with electric power when Lilienthal was chairman.

Moorehouse is retiring, and wants to give away his private library.

1. Some 300 books, listed, primarily on economics and history. Not of any special distinction as a collection; he thinks perhaps some small new college might like it.
2. a collection of paperbound documents, reports, in general area of economics. Wonders if Inst. might want to look at.
3. He wonders if there might be space at Inst. for him to rent or use for some weeks this summer, for purposes of storing and sorting out the collection.

I did not attempt to respond to any of these matters, but said that we would call him back.

WA 4-1261

(He said on 3 that perhaps you would refer him to Mike Morgan, so I asked Mike who he was, and Mike does not remember him).

Morgenbladet

30 November 1954

Dear Mr. Hafstad:

Mr. Kennan has passed along to this office your letter of November 11th. I am enclosing a copy of our informative brochure about the Institute for Advanced Study, and a copy of the recently issued Report of the Director. I believe that these two booklets will answer most of your questions about the Institute, but if there is further information that you would like to have, please do not hesitate to let us know.

Sincerely yours,

(Mrs. Wilder Hobson)
Secretary to the Director

Mr. Gunnar Hafstad
Morgenbladet

Morgenbladet

Norway's First Daily Newspaper — Founded 1819

STORTINGSPLASS — OSLO

H/G.

Oslo, November 11th 1954.

Mr. George Kennan,
Princeton University,
New Jersey.

Dear Mr. Kennan,

"Morgenbladet", which is the oldest daily in Norway, (conservative) started a new magazine last spring. Its purpose is setting the news in the fields of technology, human relations and economics in perspective. Its name is P E R S P E K T I V, which in English is just "Perspective".

We also try to follow new efforts in practical philosophy to find solutions of the problems of our time - examples may be Peter Druckers "The New Society" and "The New Science of Politics" by Hans Voegelin.

We have read some of the press reports about the work of the men of the Princeton Institute for Advanced Study. We would like to ask you how we can get an article describing the purpose of the Institute and how it works. We would eventually like to follow up such an article by inviting some of the members to write articles on specific subjects if that is possible. How can we get started on such a project?

Hoping for an early answer,

Yours faithfully

Gunnar Hafstad

Gunnar Hafstad.

Morrison Dinner

Inst. gen

Committee for
Testimonial Dinner for Dr. Robert H. Morrison

At a meeting of college representatives held on March 1, at the Robert Treat Hotel, Newark, the following was decided:

1. To present a citation to Dr. Robert H. Morrison at the dinner. Will you kindly send me your signature so that we may have it reproduced on the citation.
2. Tickets will be five dollars. We should appreciate your cooperation in having as many as possible purchased within your institution. Tickets will be sent to you in about ten days.
3. Dr. Roscoe West, President of Trenton State Teachers College, was chosen as Chairman and Toastmaster.
4. Speakers would represent the State Department of Education, the State Board of Education, the New Jersey Association of Colleges and Universities, the students in the colleges, and the non-college activities of Dr. Morrison.
5. Provision was made for the purchase of a modest gift for Dr. Morrison from the proceeds of the sale of the tickets.

Peter Sammartino

Secretary to the President

Copy for Dr. Aydelotte

December 20, 1945

Commander Samuel Eliot Morison
Navy Department
Room 3024 Arlington Annex
Washington, D. C.

My dear Morison:

Frank Aydelotte has shown me the enclosed copy of a letter which he has sent to you at Harvard. To be sure that you get it, I am sending this to the Navy Department and a copy to the Army and Navy Club in Washington.

You know, of course, of the work which has been done here by Sprout, Albion, some of my students, and me in military and naval affairs. In addition, there are one or two possibilities now in the offing which ought to make the Princeton community the center in the future for the study of military history and related subjects. You probably know that I have an authorization from General Arnold, a copy of which is enclosed, to write a volume or volumes on the AAF effort in the war.

Is there any possibility that you could come to Princeton sometime between now and the second of January? We should very much like to have you see the physical surroundings here and to become acquainted with some of the members of our Faculty. I am planning to take a badly needed holiday for the month of January, and beginning immediately after the first of the year, Aydelotte is to be in Washington as a member of the Anglo-American Commission, recently appointed by President Truman and Prime Minister Atlee, to inquire into the problems of Jewish immigration into Palestine.

I am quite confident that you would be happy here should we be able to make arrangements satisfactory to you and to us. You would be much nearer Washington than you would be at Cambridge and would, I am sure, find your association with the members of the History Department at Princeton University cordial and stimulating. You know without further word on my part how much I would be honored to have you as a colleague.

Sincerely yours,

Edward Mead Earle

December 19, 1945

Professor Samuel Eliot Morison
Harvard University
Cambridge, Massachusetts

Dear Professor Morison:

Professor Earle and other members of our School of Economics (which includes history and political science) have for some time discussed the possibility of inviting you to join the Faculty of the Institute and finish your academic career here. I am happy to say that I have now been authorized by the Trustees to extend an invitation to you and I should like very much to have an interview with you either in Princeton or Washington or wherever may be convenient for you to discuss questions of salary and retiring allowance. Since the retiring age at the Institute is sixty-five this latter is a matter of great importance which it is our policy to settle with each professor at the time he is appointed.

You will know, of course, about Professor Earle's work and how closely it would fit in with your own. There are, in addition, two or three good men at Princeton University who are interested in military history and military policy. If we could prevail upon you to join our staff we should have one of the most interesting centers in the world for these studies.

I know how strong your attachment is to Harvard but I hope you will consider our offer carefully and that you will make a visit to the Institute to discuss the matter here on the ground before coming to a decision. We shall certainly do our best to make the conditions of your appointment satisfactory to you in every respect.

Yours sincerely,

Frank Aydelotte

FA:jsr

December 19, 1945

President James B. Conant
Harvard University
Cambridge, Massachusetts

My dear Conant:

I am writing to say that the members of our School of Economics (which includes history and political science) are very much interested in Professor Morison and if he could be induced to leave Harvard we should like very much to add him to our Faculty.

The one reason which might induce him to leave would be that our Professor Earle and several men on the Princeton University Faculty are interested in military history and military policy and have formed a very strong and active group in that subject. The group would, of course, be enormously strengthened if Morison could see his way to joining us.

I am writing to Morison to make an appointment for a preliminary discussion. He will, of course, want immediately to ask your advice and I am eager that you should know both that we are approaching him and the reason why we have ventured to suggest that he might be willing to leave Harvard. I know only too well how powerful are the forces which will operate to hold him there.

With warmest regards, I am

Yours sincerely,

Frank Aydelotte

Dr. Aydelotte

Memorandum of conversation held in the
Office of the Director Tuesday morning,
November 20, 1945

Present: Messrs. Aydelotte, Stewart, Riefler, Warren and Earle.

The members of the School of Economics and Politics called to the attention of the Director their unanimous opinion that it would be very desirable to secure the appointment of Professor Samuel Eliot Morison of Harvard University as a Professor in the Institute for Advanced Study. Professor Morison, now a Commander in the United States Navy, serving as historian of naval operations, will probably be leaving the Naval service in the near future. It is believed that if he once returns to Cambridge and gets thoroughly reestablished there, he will be unlikely to consider an offer from the Institute. On the other hand, as he has been away from Harvard for some years and as his wife has recently died, an offer to him made in the very near future might meet with a favorable reception on his part.

What the Institute would have to offer Professor Morison would be association with scholars like Professors Sprout, Albion and Earle, who are now interested in military affairs, and in addition, favorable conditions of work and a location much nearer to Washington than Cambridge is. Although Professor Morison will doubtless make his decision on other than financial grounds, it was felt that he could hardly be offered less than the maximum Institute salary, and in no instance less than \$12,500. The opinion of the members of the School was that negotiations should be on the basis of \$15,000, if at all possible from the point of view of the Board of Trustees.

There is an urgent need in the Princeton community for an outstanding scholar in the field of American history. Professor Morison would fill this

- 2 -

need and would, in addition, serve to give the School of Economics and Politics a better balance among the several disciplines than it now has. He must be rated as the outstanding historian in the field of American history and is one of the two or three leading historians in any field. In addition, Professor Morison is a man of outstanding qualities of character as well as of intellect.

For all of these reasons the members of the School of Economics and Politics urged the Director to give the most serious consideration and the earliest possible action to the question of Professor Morison's appointment. The Director indicated that he would take under immediate advisement the question of Professor Morison's appointment and inform the members of the School of Economics and Politics of his decision at an early date.

THE INSTITUTE FOR ADVANCED STUDY

SCHOOL OF ECONOMICS AND POLITICS

PRINCETON, NEW JERSEY

May 1, 1945

Dr. Frank Aydelotte
Institute for Advanced Study
Princeton, New Jersey

My dear Dr. Aydelotte:

The members of the School of Economics and Politics of the Institute for Advanced Study would consider it an honor if Professor Samuel Eliot Morison of Harvard University could be added to the Faculty of the Institute.

It is no exaggeration to say that Professor Morison is the most distinguished student of American history now in active service in any American university. Furthermore, he is one of the two or three outstanding scholars in the historical profession as a whole.

His record as an author of scholarly monographs goes back to 1913 when he published a Life of Harrison Gray Otis. His Maritime History of Massachusetts (1921) is a beautifully written picture of the role which seagoing commerce played in the development of New England. He was the official historian of Harvard University. His Tercentennial History was a history not merely of Harvard but of American university education since the seventeenth century; it was awarded the Jusserand medal and the Loubat prize. Professor Morison's most distinguished work has, however, been done in connection with his chronicles of the discovery of America, culminating in the publication in 1942 of a two volume life of Columbus entitled Admiral of the Ocean Sea, which was awarded the Pulitzer prize and, in addition, mirabile dictu, was ~~also~~ a choice of the Book-of-the-Month Club. Professor Morison has also published in book form Oxford History of the United States, Builders of the Bay Colony, Puritan Pronaos, Growth of the American Republic (with Henry Steele Commager), Second Voyage of Columbus and Portuguese Voyages to America. Likewise, of course, he has published innumerable articles in the scholarly journals.

With three interludes Professor Morison has been a member of the Harvard Faculty since 1914. He served in the Army of the United States during the years 1918-1919 and through the years 1922-1925 he was Harmsworth Professor of American History at Oxford. At the present moment, by appointment of President Roosevelt, he is serving as a Commander in the United States Naval Reserve, charged with writing a history of naval operations. Everyone who knows him,

Dr. Frank Aydelotte. 5/1/45. #2.

his work, and his love of the sea is confident that this history of naval operations—in which he is being given complete freedom—will be a distinguished piece of work, comparable perhaps to his life of Columbus.

Professor Morison holds honorary degrees from Harvard, Oxford, Trinity, Amherst and Union Colleges and Columbia University.

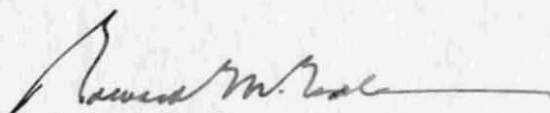

Although Professor Morison will be fifty-eight years old in July and therefore somewhat older than we would ordinarily prefer in a prospective Faculty member, there is every reason to believe that he will utilize fully the remainder of his active career in the preparation of a distinguished piece of work on the role of the United States Navy in the present war.

There is great need in the Princeton community for a distinguished student of American history and Professor Morison's appointment to the Institute would be, we are confident, generally acclaimed in the scholarly world. In addition, his interest in maritime and military affairs would add strength to the military studies group of the Institute and Princeton University.

Professor Morison's personal qualities admirably complement his abilities as a scholar. He has the highest ideals of what an American university should be, as well as great integrity in his personal conduct and standards of individual achievement.

For all of these reasons we recommend that the Director obtain from the Trustees authority to offer Professor Morison a professorship in the Institute, if and when in his judgment it is feasible to do so.

Sincerely yours,

Edward Mead Earle

Morley, Felix

October 17, 1940

Dear Felix:

I have just had word from John Nason that you would like to have me represent the Institute on Saturday morning and march in the academic procession. This I am very glad to do and shall accordingly bring my cap and gown.

Marie and I are very sorry we cannot stay for your party in the evening, but we must return here in the afternoon.

Looking forward with great pleasure to seeing you tomorrow, I am

Yours sincerely,

FRANK AYDELOTTE

President Felix Morley
Haverford College
Haverford, Pennsylvania

FA/MCE

Morrill, Burton

December 5, 1945

Dear Mr. Morrell:

Your letter came just as I was preparing to write to you about your house. The truth is that we need it desperately for an Institute family.

Am I correct in thinking that your present lease goes on until August 31, 1946? If so, we shall of course be prepared to observe the terms of your lease, but if you can find another place by next August, we should very much prefer not to renew it.

I know how difficult it is to find a suitable house in Princeton and I hasten to say that there is nobody in Princeton whom we would rather have for a neighbor than you and your family. The only difficulty is that we need the room so badly for the family of a member of the Institute.

I am anxious not to put you to inconvenience, but I should be grateful if you would make inquiries about another place, and, if you find something, give me some indication as to when it would be convenient for you to give up your present quarters.

If by any chance it should prove convenient to you to give the house up before the expiration of your lease, that would be all right with us.

Yours very sincerely,

Frank Aydelotte

Dr. J. Robert Oppenheimer
Institute for Advanced Studies
Princeton University
Princeton, New Jersey

Dear Dr. Oppenheimer:

Under the auspices of a Rockefeller Public Service Award, I am conducting a case study in research management. By visiting research organizations considered to be outstanding in their fields and holding discussions with management and staff members I hope to get answers to the following questions:

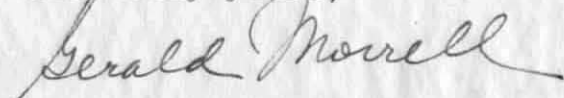

- a) how to create and maintain an atmosphere conducive to the generation of new ideas, and
- b) what are the physical and philosophical ingredients of an outstanding research organization?

May I have your cooperation in this study?

I would very much like to arrange a visit to the Institute for Advanced Studies August 5 - 7. If this date is not convenient, please do not hesitate to suggest another. Of course, any proprietary information will be kept strictly confidential and you will be sent a final report for your information and comments before it is submitted for publication anywhere.

Supplementary information and a short biography are enclosed for guidance. In anticipation of an interesting and rewarding visit, I am

Sincerely yours,

Gerald Morrell

A CASE STUDY OF RESEARCH MANAGEMENT

The last quarter century has seen a profound and, indeed, revolutionary change in our thinking on basic and applied research. From an inexpensive luxury, largely confined to the universities, research has become an expensive necessity, feeding vital information into our ever-expanding technology. And even beyond our technology the impact of research is being felt in the fields of politics, finance, and sociology.

This revolution in thought has brought with it a revolution in method. The individual researcher has largely given way to the group representing several disciplines. There are two reasons for this change, in my opinion: the problems now are getting so complicated that an attack based on a single discipline is not likely to succeed; the volume of information available in each discipline is increasing at such a rate that the probability of an individual being expert in more than one is quite small. From this follows "logically" the group approach to research. In recent years, even the universities have begun to adopt the group method.

In at least one respect this trend is lamentable. I believe that basic ideas and principles have and will continue to come from the minds of individuals. The group, at best, can only develop and test these ideas and suggest improvements.

Encouragement of individual freedom of thought within the framework of group effort is the central problem of the research manager. This breed of researcher has come along with the revolution in thought and method, and acts as the catalyst and binding cement among disciplines to produce a synergistic effect. Aside from nominal administrative duties, the principle tasks of the research manager are these: (1) define and select problem areas within which the organization can make effective contributions; (2) create and maintain an atmosphere conducive to the generation of ideas; (3) from the ideas generated, select those on which effort should be expended and encourage researchers to become interested in these ideas; and (4) create and maintain cooperation and communication among the disciplines represented in the organization.

If I am selected for an award, I would like to make a case study of research management methods by visiting a number of outstanding research organizations for a period of one or two weeks. The entire study should take six to eight months and would include interviews, discussions, and clinical observations at both management and staff levels. The time between visits would be spent organizing and analyzing the data. At the conclusion of the study a report would be prepared for publication provided permission is granted by the companies involved.

- 2 -

The benefits from such a study on my own work and growth potential are obvious. Benefits would also accrue to the NACA. Since my own organization would be included in the study, the comparisons of methods and results would be of great interest to the staff. By discussions and seminars it may be hoped that improvements in quantity and quality of output would result as well as improvements in personal satisfaction among the staff.

PERSONAL DATA

Gerald Morrell was born March 20, 1921 in Detroit, Michigan. He attended Detroit Public Schools and graduated from Wayne University in 1943 with a B.S.Ch.E. degree. After a period with U. S. Rubber Company as development engineer and a year in the Army Chemical Corps., he entered the University of Michigan and received the M.S.E. (Ch.E.) degree in 1948. After graduation, he joined the National Advisory Committee for Aeronautics at the Lewis Flight Propulsion Laboratory in Cleveland, Ohio. He is currently Chief of the Rocket Chemistry Branch, and has published reports on gas dynamics, heat transfer, corrosion, and ignition in the rocket field. In 1957 he was given a Rockefeller Public Service Award which is administered by Princeton University.

October 28, 1942.

Dear Dr. Aydelotte:

From November fifth on, I expect to be in Princeton for about a week. I should like very much to see you on this occasion and shall call up your secretary for an appointment.

I am just reading the proofs of a book of selected poems of Stefan George, translated into English by Carol North Valhope (Dr. Olga M. Perlzweig) and myself, with an essay on George by myself. I hope to be able to show you these proofs and to discuss the possibility of further work along these lines. The publisher is planning a complete English edition of George's poems, together with the first complete commentary. But this plan implies the necessity of some financial assistance - from an interested foundation - to get out a work of this scope. This is what I should like to consult you about.

Very sincerely yours,

Ernst Mowitz.

November 7, 1940

Dear Dr. Morwitz:

I send you and Mrs. Perlzweig
my warmest congratulations on this beautiful
translation of fragments of Ibycus. Also it
seems to me that the printing could not have
been more beautifully done.

Looking forward to an early
opportunity of meeting you again, I am

Yours sincerely,

FRANK AYDELOTTE

DURHAM, N.C.

September 27, 1940.

Dear Dr. Aydelotte:

I take the liberty of sending you this translation of fragments of Ibycus, attempted in the original meters in the English language probably for the first time. It is the joint work of Mrs. Perlzweig, Dietrich von Bothmer, who owes you such great thanks and myself. It purposes to be the first publication of our private press in which we hope to put out more work in the near future.

Hoping that I may again have the opportunity of meeting you, I
am

Very sincerely yours,

Ernest Morwitz.

21 May 1940

Dear Dr. Boas:

I was very much interested in my interview with Dr. Morwitz and am sure that he is a fine, sensitive scholar and critic. I was sorry to be compelled to tell him that there was no possibility of our making a place for him at the Institute. I earnestly hope that he will find a post elsewhere.

Yours sincerely,

Dr. Franz Boas

May 14, 1940

President Frank Aydelotte
Swarthmore College
Swarthmore, Pa.

Dear President Aydelotte:

I understand that you are interested in the proposed work of Dr. Morwitz on the German poet Stefan George. I have written to Mr. Wilbur Thomas of the Carl Schurz Foundation in regard to Dr. Morwitz and mentioned your name.

While Dr. Morwitz's work is outside of my field, I have a very good impression of him and I believe that with a small grant he could be established here and do useful work.

Yours very sincerely,

Franz Boas.

May 7, 1940.

Dr. Frank Aydelotte
The Institute for Advanced Study
Princeton, New Jersey

Dear Dr. Aydelotte:

I thank you for your letter of May 4 and shall take the liberty of telephoning to your office in Princeton on the morning of May 9, for an appointment on that day.

Since the data of my life and work that I gave to Dr. Flexner are presumably not in your possession, I am enclosing a Curriculum Vitae and letters of recommendation from Professor C.M. Bowra, Warden of Wadham College, Oxford, England, of the German Professor of Philosophy Schmalenbach, Dean of the University of Basel, and of Professor E.I. Salin, Head of the Department of Sociology, Basel. From these you will see that my field is not medicine.

Besides performing my teaching duties at Duke University, about which Dr. Harvie Branscomb and Dr. David Cavers - I can also refer you to Dr. R. Casey of Brown University - would be glad to give any information required, I am working on a comprehensive commentary on the work of Stefan George. For this I alone have the material, since I was his friend for thirty years until his death in 1933, and have in my possession about 400 unpublished letters written to me by him. Since Stefan George gave a new thought content and language to the German "Geistesrichtung", this book should be basic for the study of German civilization.

Very sincerely yours,

Ernst Morwitz.

I was born on September 13, 1887 in Danzig where I attended the Latin and Greek School. After the death of my father in 1902 I moved to Berlin where I graduated from the Kaiserin Augusta Gymnasium in 1906. Then I studied Law and Classics at the Universities of Freiburg, Heidelberg and Berlin and passed the Referendar examination in 1909. In 1910 I became a Doctor iuris utriusque at the University of Heidelberg and in July 1914 an "Assessor" in Berlin after having passed the requisite final examinations.

After front line ambulance service from 1914-1918 I became Judge in Berlin (Landrichter) and in 1921 was appointed "Landgerichtsrat"; In 1930 I obtained the position of "Kammergerichtsrat", that is to say, judge for the duration of life, of the highest appellate court in Prussia. Even in 1933, when the Nazi government came into power, I was not discharged but still remained in office in consideration of my special qualifications. It was not until 1936 that I had to retire after the "Reichsbuergergesetz" had been enforced, but with a full pension which is being paid in Germany even today. Numerous court decisions of mine have been published in the leading German law periodical: "Juristische Wochenschrift". During the entire period from 1918 -1936 it was part of my duties to teach students in law

Since my youth I have devoted myself to the study of literature and the classics according to the European tradition (Theodor Mommsen) which treats the history of civilization and literature with the precision of jurisprudence. I became a pupil and friend of the famous poet Stefan George, and I am known by my contributions (1908-1919) to the "Blaetter fuer die Kunst", a literary publication edited by him. I also wrote a book on the work of Stefan George, published by Georg Bondi, Berlin, 1933, which is to be found in most American University libraries, as a basic work on the subject. Furthermore I translated the poems of Sappho published already in several editions (1936,1937) by Georg Bondi in Berlin with an introduction by C.M. Bowra, Warden of Wadham College, Oxford, England. In 1939 Georg Bondi published a translation of Longinus: "On the Sublime" in which the verse passages were rendered by me.

I arrived in the United States in 1938, invited to lecture on Homer, Sappho and Stefan George by Duke University, Brown University and Smith College. Since 1939 I have been "Teaching-Fellow" in Duke University, appointed by President Few. This appointment has been renewed for 1940-41. I teach and supervise graduate research in classical subjects and give instruction in German language and literature.

Ernst Morwitz.

May 4, 1940

Dear Dr. Morwitz:

As I have succeeded Dr. Flexner as Director of the Institute for Advanced Study, your letter of April 21 has come to me. I should be most happy to see you in Princeton, but if you have in mind a grant from the Institute for work in medicine I am afraid I could not be of help to you, for that subject is entirely outside the range of our work here. I therefore hesitate to put you to the trouble of stopping in Princeton, but if you wish to do so I should be glad to see you on Thursday, May 9, or Thursday, May 23. I regret that the 15th would be an impossible day for me.

Yours sincerely,

FRANK AYDELOTTE, DIRECTOR

Dr. Abraham Flexner
Institute for Advanced Studies
Princeton, New Jersey

Dear Dr. Flexner:

You had the kindness to receive me last May with the recommendation of Dr. C.M. Bowra, Warden of Wadham College, Oxford, and suggested that I call on you again.

In the mean time I have been appointed "Teaching Fellow" at Duke University for this year and for 1941. Dr. Harvie Branscomb and Dr. David Cavers would be glad to give any desired information about my teaching activities. Since this appointment carries no remuneration with it, I should like to consult you about the possibility of obtaining a grant for a piece of work I alone have the material to undertake. I may be in New York for a few days from about May 9th to the 15th and should stop in Princeton either on the way there or back if you would inform me whether I could have the pleasure of seeing you then.

Very sincerely yours,

Ernst Morwitz

FRAGMENTS OF IBYCUS
RENDERED FROM THE GREEK BY CNV

**PRINTED BY THE SEEMAN PRINTERY, DURHAM
NORTH CAROLINA IN SEPTEMBER, 1940 ~ TWO
HUNDRED COPIES OF WHICH THIS IS NUMBER 31**

Eros under his bluish-dark lashes again
with his languishing eyes at me gazes and lures
with thousands of wiles to the nevermore disen-
tangled: the meshes of Cypris.
I fall in a tremble whenever he nears,
as in its harness accoutred, a prize-winning horse growing old now,
goes reluctantly on to the race with the swift-turning wheels.

. . . and there in the leaves of the loftiest boughs
perch the gleamy, many-hued
mallards and birds downily fledged, purple with glistering throats and
halcyons hurriedly journeying.

Myrtles and violets, golden marybuds,
apple-bloom, roses and glossy laurel foliage . . .

Full of fires as through the sovereign night
Sirius-stars all outshining . . .

Aye to me, dearest heart, as the purple-bird wide in his pinions . . .

When the lustrous Dawn shunning slumber
again wakens the nightingales . . .

. . . loosing their manifold-tinted robes
and the veils of their hair and the clasps . . .

Child of the luminous Graces, Euryalus,
you are the care of the beautiful-locked, both the
Cyprian nurtured you, and Peitho with her tenderest gaze among rose-blooms.

But in the spring the Cydonian
quinces and pomegranates moisture draw
out of the streams in the Virgins' in-
violable garden, and down-covered tendrils are
waxing on sprays of the shadow-surrendering
grape-vines in bloom. Yet for me, at no turn of the
seasons, asleep carries Love, but just as
gusts of the Northwind from Thracia en-
kindled with flashes of lightning, so
HE full of withering madness from Cypris comes
rushing: with darkness and daring
sovereign watch from my boyhood held
over my senses . . .

Gentlemen:

We are in need of defense expenditure data for each of the major countries of the world, particularly member countries of NATO, SEATO, Japan and S. Korea, and the non-aligned countries for each year of 1960 - 1965 and recent estimates for each year of 1966 - 1971.

It seems possible that your organization may have already collected these figures for some of your studies. If so, we would appreciate receiving the figures and/or publications containing the data requested.

Thanks for handling our inquiry.

Sincerely,

Mystivec
Complete file sent to Miss Blake

February 7, 1947

Dear Professor Hromadka:

I have discussed the case of Mystivec with one or two of our mathematicians and I should be grateful if you would ask him to fill out the enclosed application blank and send it to Professor Hermann Weyl of the School of Mathematics here at the Institute. He should send in supporting material available, such as publications, references, and testimonials.

It looks as if competition for places in the School of Mathematics for the academic year 1947-48 is going to be very keen and if it were equally convenient for him to come for the year 1948-49, he would probably have a better chance of receiving a stipend.

I can assure you, however, that his application for one year or the other will have the most careful consideration.

Yours sincerely,

Dear Sir,

we beg to send you enclosed our questionnaire with the request to fill it up with the latest dates about the Institute for Advanced Study for publication in the new, 31st edition of our Minerva-yearbook of the learned world. We should be very much obliged to you if you would not only give us the dates concerning budget, enrollment, foundation etc. but also a complete list of the teaching staff (professors, associate professors, their name^s and christian names and chairs). The information about the Institute for Advanced Study would then in the new edition be as complete as the information about the universit^ees and colleges of the world the yearbook is referring to.

Already in Part One of the 31st edition, which contains informations concerning the scientific institutions which are not teaching establishments, we published a short article about the institute. For publication of Part Two, which refers to the universites and colleges of the world, this notice would be too small and not at all according with

„MINERVA“, JAHRBUCH DER GELEHRTEN WELT

VÖL. 31

WALTER DE GRUYTER & CO., BERLIN W 10

BERLIN, MAY

DEAR SIR,

Volume 31 of the “Jahrbuch der gelehrten Welt, Minerva” begins a new period in the development of this work which has promoted closer relations between institutions and individual members of scientific and learned societies since 1892. After careful consideration the editorial staff have come to the conclusion that it is no longer feasible to publish the yearbook in three bulky volumes of about 4500 pages. It is necessary to consider present economic conditions. In doing so we feel confident that we shall retain all those circles as friends of the yearbook who have patronized it for several decades.

Our plan is as follows: **The first volume** will contain all informations about research institutes, libraries, archives, museums, learned societies, observatories etc. i. e. about institutions which are not primarily devoted to instruction. This volume will be completed by special indexes for ready reference. This arrangement will make it possible to use the volumes during a longer period than hitherto. Further, we intend, should conditions make it desirable, to publish in the following years small supplements of changes in the staff of institutes in order to be always up-to-date.

The second volume of the yearbook will contain informations about universities, colleges, and similar teaching establishments. A carefully compiled index will enhance its usefulness. The enclosed Questionnaire is limited to the requirements of the first volume of “Minerva”. As the work has to be completely rewritten we should be much obliged if you would look carefully through the proof or the Questionnaire. The more carefully this is done, the more uniform the whole work will be, and the greater its value.

In conclusion we again request your kind help in drawing our attention to institutions of every kind which have hitherto not been included in “Minerva”.

Faithfully yours,

THE EDITORIAL STAFF OF “MINERVA”.

Minerva

“MINERVA”,
YEARBOOK OF THE LEARNED WORLD

THIRTY-SECOND YEAR

WALTER DE GRUYTER & CO., BERLIN W 10

BERLIN, DATE AS POSTMARK

DEAR SIR,

The last edition of the “Minerva” has been divided into two parts according to their contents,

1. Scientific institutes and institutes of learning (without instruction).
2. Universities.

Part one will be valid for some years as there are few alterations. On the other hand part two of the “Minerva” being liable to continuous changes has to be published at short intervals in order that the information may be always reliable. For this reason we are now preparing a completely new edition of this part which will come out at the beginning of next year.

Enclosed you will find a proof-section of the second part of the 31st volume of the “Minerva” published in 1934. We beg you to verify the entries and, if necessary, to correct and complete the text considering the following points: —

- 1) Complete enumeration of the departments, sections, resp. faculties.
- 2) New annual budget.
- 3) Statistics of the number of students.
- 4) Statements on the classifying of studies and terms.
- 5) Complete list of seminars, institutes, and libraries (and other collections).

In order to facilitate the work of the editors and to avoid faults we beg you to write clearly.

THE EDITORS

Dear Professor Flexner:

I gratefully accept your invitation to be a member of the Institute for Advanced Study for the first term of the next academic year. Thank you also for the award of the stipend which will make it possible for me to spend an interesting and profitable semester in the stimulating atmosphere of your Institute.

Yours very sincerely,

Henry Margenau.

HM:D

Margenau, Henry

November 9, 1939

Mr. Morgenstern called and said that the situation had changed somewhat since talking with Dr. Flexner last spring, that he appreciated very much the offer of a room for himself in Fuld Hall, that he would like to leave it in suspense for a while. Later he would like to have an interview with President Aydelotte in order to make his acquaintance, etc.

Evelyn S. Bailey

October 25, 1939

Immediately upon receipt of the attached letter I telephoned Mr. Morgenstern stating that I feared that there was a misunderstanding about the use of a room for him in Fuld Hall, that the Institute was very happy for him to have a room here but that it could not be assigned to an assistant or used for storage purposes as indicated in his letter, that the Institute had declined other requests that rooms be used by assistants and others not on the Institute staff, and that it would be difficult for the Institute to diverge from this stated policy.

Mr. Morgenstern asked when Dr. Flexner would return.

I reported that he would be in his office next week and Mr. Morgenstern stated that he would talk the matter over with him then and to let it rest in abeyance in the meantime.

When the question of Mr. Morgenstern's having a room in Fuld Hall was raised, Mr. Riefler stated expressly that the economists would be happy to have Mr. Morgenstern near them for conference but that they would not approve that a room be assigned to his assistant or used as a place for filing material, etc. Mr. Riefler further stated that, inasmuch as he and Mr. Stewart were in Washington, there would be no advantage in Mr. Morgenstern's being in Fuld Hall in their absence.

Dear Dr. Flexner ,

I have pleasure in sending you under separate cover a copy of my book on "The Limits of Economics" which was published a short time ago. I presume that you may have some interest in reading it, since it deals with some of the border-questions between economics and practical life; I also tried to stress the primary scientific characters of economics.

I have been nominated Carnegie Visiting Professor and shall spend a few months in the United States in the first half of 1938. I am much looking forward to seeing you then. I have met Professor Riefler on several occasions in the last year and have been greatly impressed by the achievements of your Institute in so many fields of learning.

Believe me, dear Dr. Flexner,

yours very sincerely,

O. Morgenstern

Morganthau

THE SECRETARY OF THE TREASURY
WASHINGTON

June 17, 1937.

Dr. Abraham Flexner, Director,
The Institute For Advanced Study,
20 Nassau Street,
Princeton, New Jersey.

My dear Dr. Flexner:

Your letter of June 9, which came during my absence from Washington, is before me. I want you to know that we appreciate the action of the Institute in making it possible for us to have the benefit of Mr. Riefler's counsel and advice on economic questions of current importance. I feel that the Institute, through Mr. Riefler, is rendering an important public service.

The rule of the Institute against the acceptance by its members of remuneration of any kind, even of expenses, is thoroughly understood and will be respected. We are happy to have Mr. Riefler with us on this wholly unofficial basis, and confident that the relationship will be mutually beneficial. He is here with us this week and we are already finding his knowledge and experience of value to us.

Cordially yours,

A large, stylized handwritten signature in dark ink, appearing to read 'H. Morgenthau'.

Secretary of the Treasury.

Morgenthau, Henry

THE SECRETARY OF THE TREASURY
WASHINGTON

October 24, 1939

The Director,
The Institute for Advanced Study,
Princeton, New Jersey.

Dear Sir:

I have been advised by Dr. Flexner that consent by the Board of Trustees of the Institute for Advanced Study made it possible for him to grant my request for emergency service in the Treasury Department by Mr. Walter W. Stewart and Mr. Winfield Riefler.

Please be so good as to convey to the Trustees of the Institute an expression of my deepest gratitude for this action. The services of both these distinguished gentlemen are proving to be of the greatest value to this Department in the consideration of the difficult problems we have to face. I find in this fact my justification for making so heavy a draft upon your staff.

Sincerely,

H. Morgenthau
Secretary of the Treasury.

June 9, 1937

Dear Secretary Morgenthau:

Mr. Riefler has reported to me in strictest confidence the essence of his recent conversation with you. I may begin by assuring you that the Institute has as a matter of principle endeavored to be helpful to all educational institutions, and it goes without saying that we should be happy to be helpful to the United States Government.

Experience has, however, proved that there are certain pitfalls that must be avoided by an institution desirous of preserving a strictly scientific attitude. We are concerned as an institute with ascertaining with the utmost objectivity what is right and sound as against what is doubtful and unsound. The field of economics is the most difficult field in which to preserve an absolutely correct scientific attitude. For that reason we have made it a rule, as you will see if you will examine the marked passage enclosed, (an excerpt from the latest Bulletin of the Institute), to which we have inflexibly adhered that salaries and retiring allowances should be so adequate that no member of any department of the Institute may accept remuneration even of his expenses from any outside source whatsoever.

Riefler and those associated with him are endeavoring to create in this country a sound science of economics, in so far as the nature of the material permits. They are thereby estopped from entering upon the field of policy or

expediency which is bound to affect in greater or less degree the action of those who possess responsibility. It would, I think, be a mistake for any member of the Institute to have an official connection with any governmental or business enterprise, but I should welcome any opportunity which will enable a person in Riefler's position to discuss with you fundamental financial problems and to give his judgment as to what is sound or unsound without reference to other considerations which may have to influence policy. The Institute will gladly bear any expense connected with any service of the kind above mentioned that Mr. Riefler may be able to render you, and I trust that you may completely understand the principle under which an institute of this character is bound to adhere.

With all good wishes,

Sincerely yours,

The Honorable Henry Morgenthau, Jr.
Secretary of the Treasury
Washington, D. C.

December 7, 1935

Dear Mr. Morgenthau:

Thank you very much for your very kind note of December 3. I am enclosing copy of the Certificate of Incorporation of the Institute, and I am also sending a similar copy to Mr. Durning, in the hope that the decision can be facilitated.

I am delighted to learn that you will let me know in advance of your next visit to Princeton. It will give me great pleasure to bring together a few of our "stars" to meet you and your wife at dinner.

With all good wishes,

Sincerely yours,

ABRAHAM FLEXNER

Morgenthau

TREASURY DEPARTMENT

WASHINGTON

DEC 3 1935

My dear Dr. Flexner:

I am in receipt of your letter of November 9, 1935, concerning the importation of books for the library of the Institute for Advanced Study.

As you state that the Collector of Customs at New York is assessing duty on the material which you are now importing, I am asking him for an early report in the matter. The question which you raise has not been the subject of a ruling by the Department, as the only previous case involving your institution shown by our records related to material not specially provided for in paragraph 1631 of the Tariff Act and did not involve the status of the institution under that paragraph.

Booksplate

Upon receipt of the Collector's report the matter will be given very careful consideration to determine whether the privilege of free entry may be given your institution under paragraph 1631 of the Tariff Act of 1930, and I shall be glad to advise you as soon as a decision can be reached.

With kind personal regards,

Sincerely yours,

J. Morgenthau Jr

Secretary of the Treasury.

Dr. Abraham Flexner,
Director,
The Institute for Advanced Study,
20 Nassau Street,
Princeton, New Jersey.

P.S. The next time we come to Princeton we certainly will let you know in advance

Morgenthau

November 9, 1935

Honorable Henry Morgenthau
Department of the Treasury
Washington, D. C.

Dear Mr. Morgenthau:

The Institute for Advanced Study has found it difficult to impress upon the Collector of Customs, Post Office, New York City, the fact that the Institute for Advanced Study is an institution of learning and as such comes within the scope of Paragraph 1631 of the United States Congressional Tariff Act, No. 361, 71st Congress. As far back as 1932, before the Institute had moved from New York City to Princeton, we made a payment of \$75.31 in order to procure the release of some library material from the Foreign Traffic Department of the American Express Company. I asked Mr. Alfred A. Cook to investigate the matter for me, and he told me that the Washington Collector of Customs had ruled that the material should be duty free and that a refund would be made, but there has been no refund as yet. This, however, is a matter of small importance. It is more important that books which we are now importing, addressed to the Library of the Institute and for use in the Library, (and which we shall import in increasing number in the very near future) are being taxed.

I wonder whether I can intrude upon your already crowded day long enough to ask you to have someone make it clear to the New York authorities that the Institut for Advanced Study is entitled under the above-mentioned law to import books and

Hon. Henry Morgenthau

November 9, 1935

2

material for its library duty free.

I was very much pleased to see you and your wife when you were in Princeton recently. Should you be coming again to see your boy, perhaps you would let me know in advance, and we could all have dinner together and, if you would like, I will ask Riefler and his wife to join us.

With all good wishes,

Sincerely yours,

ABRAHAM FLEXNER

DUKE UNIVERSITY HOSPITAL
Box 3322
DURHAM, N.C.

May 4, 1939.

Dr. Abraham Flexner
Princeton, N.J.

Dear Dr. Flexner:

I am taking the liberty of writing to you without having the pleasure of knowing you personally. But I think you knew my mother, the bacteriologist Lydia Rabinowitsch-Kempner who often talked to me about you and Dr. Simon Flexner whom I had the privilege of meeting a few times. The purpose of this letter is to recommend to you Dr. Ernst Morwitz who is just spending a short time in Princeton. I should be very thankful if you could call him to make an appointment and talk over his situation with him. I address myself to you because I know of no one who could be of so much help in this matter, and on the other hand, because I think the matter is worth your help, Dr. Morwitz being one of the most eminent German scholars who recently came to this country.

Dr. Morwitz would like to have some sort of teaching or research position at a university or college, preferably in the neighborhood of Durham. He is fifty-two years old. His special fields are German and Comparative Literature and the Classics. He started his career in Law and was a judge in the Supreme Court of Prussia (Kammergericht, Berlin) until 1936 when the anti-Jewish legislation made it necessary for him to leave his position and later on the country. He has written a number of articles in German law periodicals. In addition to his activities as judge in the Supreme Court he has achieved special renown as a man of letters. Many original contributions of his were published in the most exclusive German literary periodical, "Blätter fuer die Kunst". In 1934 he published a book on modern German poetry and in 1936 and 1937 translations of the poems of Sappho from Greek into German verse. Besides in his work on new translations from Homer and Alkman which will soon be published, Dr. Morwitz is at the moment chiefly interested in preparing an edition of hitherto unpublished letters of the poet Stefan George, a great number of which are in his possession.

Dr. Morwitz came to this country last year in November. Up to now he has only given a few lectures on subjects of Greek and German literature in Duke and Brown Universities and in Smith College.

I enclose a letter about Dr. Morwitz which I received from C.M. Bowra, professor of classical philology in Oxford, England, and who wrote the introduction to Dr. Morwitz' translations of Sappho.

Dr. Morwitz' present address is: Dr. Ernst Morwitz c/o Dr. E. von Kahler, 310 Nassau Street, Princeton, and I have let him know that I am writing to you about him. I feel that your interest and advice would be of the greatest value to him in his present situation.

Very sincerely yours,

Walker Kempner

University of Basel, Switzerland

Faculty of Philosophy and History

Basel, November 2, 1938.

I have known Dr. Ernst Morwitz of Berlin, personally and through his writings since the autumn of 1909, that is to say, for almost thirty years. I esteem him as one of the most subtle scholars in the field of German language and literature, as comprehensively educated in all fields, as an excellent author and poet, but also as a man of absolute personal integrity, of exemplary life and culture and of social bearing as well. As a teacher of German language and literature he would be an asset to any institution of higher learning.

Dean of the Faculty of Philosophy and History

Staatswissenschaftliches Seminar
der Universitaet Basel.

Basel, den 1. November, 1938.

Certificate.

Dr. Ernst Morwitz, born at Danzig, has held, due to his eminent gift for the bar, one seat of the highest Prussian law-court, becoming "Kammergerichtsrat" at Berlin, still relatively young in years. Besides of his professional activity, Dr. Morwitz has found leisure to occupy himself with literature and is widely known as a man of letters and as poet. His book "Die Dichtung Stefan Georges" is the best introduction into the works of the German poet; it shows Dr. Morwitz' ability of understanding and interpreting even the most difficult text. His youngest work, the translation of the great poems of Sappho into German, is the prototype of perfect reproduction of an original equally difficult in rhythm and language. - But the influence of Dr. Morwitz is not restrained to his books: his strongest influence evades from his personality. The number of young men who owe him the direction and moulding of spirit and the effective guidance of life, is great. There is no doubt that with his noble character, with his quiet and calm manners, Dr. Morwitz will become a prominent member of any educational body and will turn to the honour of every one. Dr. Morwitz having been forced to leave Germany in consequence of the non-aryan laws, the call of this most unusual tutor and educator can be deeply recommended to any institution of any country which admits to the higher education of soul and mind the predominant importance, which is needed in the cultural situation of the civilized world of today.

Dr. Edgar Salin

(Dr. Edgar Salin)

Professor at the University of Basel
Director of the Institute of political Economy.

I was born on September 13, 1887, in Danzig where I attended the Latin School. After the death of my father in 1902 I moved to Berlin where I graduated in 1906. Then I studied Law and Philosophy (literature) at the Universities of Freiburg, Heidelberg and Berlin and passed the "Referendar" examination in 1909. In 1910 I became a Doctor of Law at the University of Heidelberg and in July 1914 an "Assessor" in Berlin after having passed the requisite examinations.

After serving in the war I became Judge in Berlin in 1918 with the position of "Landgerichtsrat" and in 1930 obtained the position of "Kammergerichtsrat". Even in 1933 I was not dismissed but still remained in office as a judge in the senate of the highest Prussian court, the "Kammergericht" since I had been an active soldier in the world war and in consideration of my special qualifications. It was not until 1936 that I had to retire, though with a full pension, after the "Reichsbuergergesetz" had been enforced. Numerous court decisions of mine have been published in the leading German law periodical: "Juristische Wochenschrift". During the entire period from 1918-1936 it was part of my duty to teach students in law.

Since my youth I have devoted myself to the study of literature and classical languages and I am known in literary circles by contributions (1908-1919) to the "Blätter fuer die Kunst", a literary publication edited by Stefan George. Furthermore I wrote a book on Stefan George published by Georg Bondi, Berlin in 1933, and a translation of the poems of Sappho (1936, 1937) of which there have been several editions.

Invited by the Greek Department of Duke University, Durham, N.C., Brown University, Providence, R.I., Smith College, Northampton, Mass., Bennington College, Vermont, and Skidmore College, Saratoga Springs, N.Y., I am planning to give lectures on the early periods of Greek poetry: Homer, Sappho, Alkman, literature in which I am specializing.

I enclose letters of recommendation of the well-known English Greek scholar, Prof. C.M. Bowra, Warden of Wadham College, Oxford, England, of the German Prof. of Philosophy Schmalenbach, Dean of the University of Basel, and of Prof. E.I. Salin, Head of the Department of Sociology, Basel.

I have known Dr. ERNST MORWITZ for some years and have come to regard him as one of the most remarkable men of my acquaintance. He had for many years a distinguished career at the German bar, where he became a judge of the 'Kammergericht', the highest Prussian law-court, at the age of thirty-nine. But in spite of his heavy professional duties he was none the less able to win a special renown as a poet and man of letters. - As an intimate friend of the great German poet Stefan George he played a considerable part in the revival of German letters since 1910 and published both original poems in 'Die Blätter für die Kunst' and a book of great distinction on George. - In recent years he has published some very remarkable translations from the Greek of Sappho which are among the best that I know and have won for him a great reputation in circles where such work is appreciated. - He is now busy translating other Greek poets with an exactness and poetical feeling to which I know very few parallels. He is anxious to obtain some kind of teaching post. For this he is excellently qualified by his literary gifts, his scholarly knowledge of Greek, Latin, German and French which would enable him for instance to give good lectures on comparative literature, his acquaintance both in practice and in theory with Roman and German law, and by his lively interest in young people and their educational problems. He is a modest and charming man, with a bright, original mind and plenty of exciting ideas. I feel sure that he would be a great addition to any educational institution and add something unique to its intellectual and spiritual life.
