

25 June 1979

Dear Armand:

Thank you very much for your thoughtful, considerate letter of 18 June. I assure you that the same environmental and humane matters that you raise in your letter are shared by all of us looking into the possibility of using part of the farmland for a housing development. For example, we are certainly taking seriously the need to increase the physical distance between the actual housing and the forest.

The suggestion of a series of successive steps beginning with the most distant location from the Institute is certainly sound and is on its way to being shared with the architect, developer and Trustee Committee.

As for the actual financial arrangement and the possibility of continuing income, these issues are still most fluid and still being discussed so that there is no concrete idea to place before anyone as to the actual financial rewards to be expected and in what manner they are to be achieved.

Again, thank you for the expression of your concerns; I share them with equal intensity.

Sincerely yours,

Harry Woolf

Dr. Harry Woolf
Fuld Hall

Dear Harry:

This is a comment on the informal presentation you gave in May to some of the Faculty about the plans for housing on Institute farmland. I would like to make more precise some of the remarks or questions raised then.

1. There is widespread concern about the scope of the plan. If there are to be 1000-1200 units, it is reasonable to expect that this would bring a total population of at least 3,000 people there, and this would be bound to have a considerable environmental impact. As you no doubt remember from the meeting, many are worried in particular about the use of the field closest to the Institute (zone D on the map) which would be likely to increase traffic close to the Institute. It seems to me that at least that part should be given up, and the field restored to woods, to serve as a buffer between the Institute and this project.

2. You said the Institute would have a veto right on the construction, and would have the possibility of getting out of this arrangement, if this seemed advisable. It seems to me this would be more easily achieved if there were a much more flexible plan, which would provide for a number of successive steps, starting furthest from the Institute in such a way that if the construction was stopped at some stage, one would still have a reasonably self-contained and attractive entity. This is all the more important because the selling of the land is an irreversible process and is a loss of permanent assets which should be kept at a minimum.

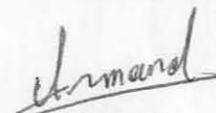

3. If this project comes about, the Institute would of course get money from the selling of the land, and from the rental of apartments, if there were some. But I believe you were alluding to other sources of steady income. I must say I do not see what they could be. It does not seem to me possible that independent buyers would accept submitting to the obligation of reselling to the Institute, and seeing the Institute make a profit from the sale to new occupants. I understand that in so-called adult communities, like Rossmoor, there are some recovering clauses, but even there they are not that drastic,

2 - Harry Woolf
June 18, 1979

even though people may be more inclined to give up certain rights since they receive in exchange an array of services which are out of consideration here. Of course, I know that the Institute has a recovery clause with Faculty members who have bought some land or a house from the Institute. But this is a very different situation. We agree to this first of all to help the Institute keep housing available to the Institute Faculty at affordable prices, and, frankly, we do not expect the Institute to make a profit by reselling to a Faculty member.

In conclusion, I should say I do not oppose this project in principle, and I am ready to believe that some such use of some of the farmland will be necessary. Also, I do not claim any expertise in this matter. I am simply writing as a member of the Institute community who is concerned about the possible effects of such a development on the quality of life here, and who is trying to weigh this against the possible financial gains to the Institute. At this point it is just not possible to estimate those on the basis of the information you gave us, and I hope that realistic estimates of what the Institute could hope to gain from various projects will soon be available. Although this is not properly a Faculty matter, I also hope that we will have the opportunity to discuss this matter during the coming academic year, when more precise information is available, before any decisions are made.

Sincerely yours,

A. Borel

Dear Armand:

Thank you for the attached. I have given a copy to Allen Rowe and discussed the contents with him. He will see to it that its provisions are carried out with respect to the retirement income of professors emeriti.

Please let me know if there is more I need to do in this regard.

Yours,

John Hunt
Associate Director

23 April 1979

Professor Armand Borel
School of Mathematics
The Institute for Advanced Study

Dear Armand:

I am most appreciative of your thoughtful letter of 19 April concerning the Faculty meeting. Indeed, the very point you make is just as I wish events to go. The rather new question emerging from the Ford Foundation's interest in people in minority groups is the kind we should deliberate with as much preparation and with as much detail as possible. The issue in our hands was only a few weeks old and, you are quite right, normally would have been brought to the attention of the Advisory Committee first, but other events and other obligations to which you referred correctly did limit the frequency of such meetings this year. We shall do better in the future, of course.

In the meantime, I am expecting to hear from the Ford Foundation in writing very soon. I addressed a series of questions to them reflecting our concerns and interests vis-à-vis their new program. An informal reply via telephone just the other day suggests that they will be sympathetic to our desires, and when I have their comments in writing, we shall move as effectively as possible to discuss the matter with the Faculty in order to reach a decision.

Thank you again for your sympathetic letter and for your understanding of the situation.

Cordially yours,

Harry Woolf

SCHOOL OF MATHEMATICS

April 19, 1979

Dr. Harry Woolf
Fuld Hall

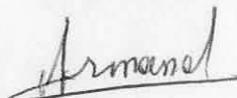

Dear Harry:

Before our most recent Faculty meeting, I asked Mrs. A. LaBrutte about an agenda, and was told there would be none: this was just an end of the year meeting, with no important business except for a report from you. As it turned out, you asked our opinion about a completely new question: the request of the Ford Foundation about memberships for people in minority groups they would try to find. There resulted a somewhat confused discussion, since it was difficult for us to make up our mind right on the spot. It seems to me you might have received a more coherent, and hence more useful, answer had we had a chance to think it over in advance and maybe discuss it between ourselves.

This shows me that, even in that case, it would have been useful to have an agenda. I would like to suggest, therefore, always having agendas distributed in advance of Faculty meetings, with whatever supporting material might be relevant. This is not just for the sake of orderly formal conduct of business, but even more for the sake of more effective meetings.

In fact, it might have been even more useful to convey this question to us first through the mechanism of the Advisory Committee. I understand, of course, that the Einstein Centennial has taken up much of your time and thoughts during this academic year and that it was not easy to schedule meetings of the Advisory Committee. Although no major problems have arisen, it seems to me it would still have been good to discuss some questions which came up via this committee, and I hope it will meet more often in the future.

Sincerely yours,

A. Borel

Dear John:

Did you really write a month ago to tell me of Anne Borel? It is possible that it could be longer.

At any rate, I met with her. She is splendid. It is the South Street Seaport that is not ready, and I said as much. Evidently, the cultural mafia of New York City is at work on her behalf. I hope something comes of it for her.

When are you going to let me show you the Seaport? Since Weinstein deserves all the credit, we should probably include him as well.

Best regards,

John B. Hightower

Dr. Harry Woolf
Fuld Hall

Dear Harry:

As I told you at tea yesterday, I do not want to address the question as to which of my publications are "significant." By the way, as I read it, your letter does not specify whether or not only publications connected with the Institute should be listed. At this point, I have only updated my bibliography. I would of course be ready to single out the items associated with the Institute. I reiterate my misgivings about a collection of reprints by Faculty and Members because of its size, lack of usefulness, and the impossibility of making it complete. If there are other opinions within the Faculty, it seems to me the matter should be brought up at an Advisory Committee meeting.

Sincerely yours,

A. Borel

JOB OBJECTIVE Museum Work

EDUCATION

June 1978 B.A., Anthropology, Brown University, Providence, Rhode Island.
1976-1977 On leave of absence from Brown University, attended University
of Washington part time in Seattle, Washington.
Summer 1976 Field School, Ozette Archaeological Project on Olympic Peninsula
with Washington State University, Pullman, Washington.
1973-1975 Sculpture Department, Rhode Island School of Design, Providence,
Rhode Island.
Summer 1973 Summer school in art history and Italian, Urbino, Italy.
June 1973 Graduated from Stuart Country Day School, Princeton, New Jersey.

EMPLOYMENT

1978 Lab Crew, University of South Dakota Archaeology Lab, Vermillion,
Fall South Dakota, washed skeletal remains and artifacts from prehis-
toric Crow Creek village site.
1978 Lab Crew, South Dakota Archaeological Research Center, Fort
Fall Meade, South Dakota, processed soil samples and labelled artifacts
from 12 sites, mostly prehistoric, drew pottery and developed
black and white photographs.
1978 Surveyor II, Fort Meade South Dakota Archaeological Research
Summer Center, cultural resources evaluation of Black Hills area, test
excavations and surface collection.
1977 Lab Crew, Lubbock Lake Project, Texas Tech University, Lubbock,
Summer Texas, kill sites from Paleo-Indian through historic time periods.
1977 Library Assistance, Suzallo Library, University of Washington,
Winter Spring Seattle, Washington, shelved and recirculated books.
1977 Volunteer, Seattle Art Museum, Seattle, Washington, worked on
Winter Spring recataloguing collection, especially asiatic jades and mesoamerican
ceramics.
1975 Field Crew, Colonial Fort Site, Jamestown, with Rhode Island
Summer Historical Preservation Society, Providence, Rhode Island.
1974 Counselor, Les Châteaux Français, French camp for girls, Deer Isle,
Summer Maine, taught French and arts and crafts.

ADDITIONAL
INFORMATION

Bilingual (French and English), 2 years college German, some
knowledge of Italian and Spanish.

28 November 1978

Dear Armand:

The Institute for Advanced Study is now in the process of preparing an Einstein Centennial Celebration in honor of the one-hundredth anniversary of Albert Einstein's birth.

A principal feature of the Celebration will be a Symposium to be held at the Institute on March 4-9, 1979, dealing with the specific aspects of Einstein's scientific work. The emphasis throughout will be on both the historical context and the continuing importance of Einstein's ideas in various fields, perhaps bearing in mind Einstein's remark that "the most incomprehensible thing about the world is that it is comprehensible."

The Planning Committee for the Symposium consists of the following members:

Freeman Dyson
Herman Feshbach
Marvin Goldberger
Gerald Holton
Martin Klein
Abraham Pais
John Wheeler
Harry Woolf (Chairman)

The audience for the Symposium and its published product will be on the one hand the community of scientists of the present and immediate future and, on the other, future historians who will look to this record for some answers to the questions of how Einstein and the physics he helped to create influence, either explicitly or tacitly, the science being done today.

Dr. Armand Borel

Page 2

It is our intention that the Symposium be an occasion where scientists and scholars can reflect on what science is, and how at its best it is carried out, with specific reference to Einstein's work.

On behalf of the Institute for Advanced Study and the Planning Committee, I am writing to invite you to participate in the Einstein Centennial Symposium. The attached preliminary program will give you a sense of the substance of the meeting; further details will be sent to you at a later date.

I look forward to hearing from you soon, and very much hope that your answer will be affirmative.

Cordially yours,

Harry Woolf

Dear Harry:

Thanks for your kind letter of August twenty-second. I must say I do not understand why I should be "cordially invited to attend" a mathematical lecture at the Institute, which, as it should, was decided upon by the Faculty of the School of Mathematics.

Sincerely yours,

A. Borel

AB:MMM

March 31, 1977

Dear Gaby:

Your note of 15 March 1977, reached me just before I left on an extensive trip to the West Coast, from which I have just now returned. Forgive me for taking so long to acknowledge its presence here, but please understand that much that concerns the former John Wheeler house is beyond my control. I have placed the question of its future use before the Board of Trustees where the matter now lies. Indeed, I have been instructed by the Board that the disposition of the house is entirely within their hands. I believe they are fully informed of the various issues that have arisen in connection with its history, and I believe they share everyone's concern that as harmonious and just a decision as possible concerning its future be achieved.

In the meantime, as I indicated to Armand sometime ago, it is both off the market and unavailable for examination. I wish that I could be more helpful to you for I recognize the pressing obligations of travel as well as your need to make a decision about enlarging your present house, but the issue is not mine to resolve.

With all best wishes and kindest regards, I am,

Cordially yours,

Harry Woolf

March 15th, 1977

Dear Harry,

I was just thinking that Armand is leaving
at the beginning of May, and I might too.
So, since we have never seen the Wheeler house,
and ~~would~~ have priority, (the other parties have
already seen it) could we please borrow the
keys, and go through it, in order to have time
to make up our minds.

It would be especially helpful since Armand
and I are waiting for a third bid in enlarging
our own house, and we will have to make a decision soon!

I hate to bother you with that matter,
and hope that I am not taking too much
of your time.

Thank you, dear Harry, for giving it
some attention, and receive my kindest
regards,

Gaby (Borel)

THE DIRECTOR

February 10, 1971

Memorandum for the Record

Conversation with Prof. Borel in the Director's Office

on Monday, February 8, 1971 at 2:45 P.M.

Professor Borel raised the question of whether Herman Goldstine was being invited to come back to the Institute, and if so in what capacity. He said he had heard a rumor that Goldstine was planning to rent a house. I responded by saying that:

- (1) Goldstine is thinking of returning to Princeton to live, on the basis of his IBM Fellowship;
- (2) I was not about to rent him a house; I did not have a house to rent;
- (3) If the Faculty of Mathematics had no desire to invite him as a visitor, obviously I would not wish them to do so. However, there was a question, the answer to which at this moment I did not know. It might be that he was still a permanent member.
- (4) If he returned to Princeton and wishes to be connected with the Institute, it may be that another Faculty would invite him if the Faculty of Mathematics would not.

C.K.

Carl Kaysen

Professor Armand Borel
Institute for Advanced Study

February 13, 1970

Dear Armand:

Thanks for your note. I am glad to discover that my every word receives such careful attention.

What I was trying to convey to the Faculty was that the single case of Milnor is not in itself convincing evidence that we are not competitive at present salary levels as far as Mathematics goes.

I intend, as I said to Milnor, to raise the question of a salary increase with the Board next year, and indeed have so stated to members of the Executive Committee already.

Cordially,

Carl Kaysen

Professor Armand Borel
Institute for Advanced Study

THE INSTITUTE FOR ADVANCED STUDY
PRINCETON, NEW JERSEY 08540

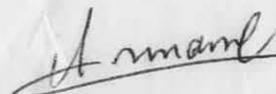

SCHOOL OF MATHEMATICS

2.9.70

Dear Carl :

I find your statement about salaries increase on p.5 of the minutes of our last Faculty meeting slightly puzzling, in the light of what you told me you said to the Milnors. I understood you told them you would try hard to get a \$5000 increase starting July 1971, and thought you had a .8 chance to get it, and you felt even more of an obligation to do so if he would accept. This does not contradict flatly what is in the minutes, but, without some clarification, I do not find it quite consonant with it, and I am wondering how Milnor would feel about this, if he were to see this by accident.

Sincerely yours

(A. Borel)

1-14-78

PROFESSOR BOREL'S CHILDREN:

| | | |
|-----------------|------|--------------------|
| Dominique Susan | born | May 4, 1954 |
| Anne Christine | born | September 20, 1955 |

December 22, 1969

Dear Armand:

The figures on the two houses are as follows:-

24 Haslet Avenue:

Our purchase price - \$82,500
Sale price, accordingly - \$55,000
\$40,000 4% mortgage (30-yr.) would have monthly
payments of \$190.00
Annual taxes - \$1,705

This house has 5 bedrooms, one of which is
rather small, and 2 baths.

5 Newlin Road: (Atiyah's)

Purchase price - \$85,000
Sale price - \$56,600
\$40,000 4% mortgage (30-yr.) - same payments
as above
Annual taxes - \$1,920

This house has 5 bedrooms of rather larger size
and 3 baths.

Michael's house, of course, would be available
almost immediately or whenever Milnor wanted it. The Newlin
Road house is rented until 1st August. The Milnors, of
course, would be able to see both houses any time they
want.

Cordially,

Carl Kaysen

Professor Armand Borel

December 10, 1969

Dear Armand:

Here is an enlargement of a picture
of you and Harish which we took last fall; I
thought you might like to have it. Harish has
one as well.

Cordially,

Carl Kaysen

Professor Armand Borel
Institute for Advanced Study

Enclosure

October 17, 1969

Dear Armand:

By now you probably will have heard what the outcome of the Faculty Meeting on the 13th was. The full Minutes apparently require a good deal of correction, but the motion that was finally passed with relation to proposed new appointments in new fields was as follows:

"In order to form an independent opinion on the merits of new fields of study and of nominees for professorships in these, the Faculty wishes, as such nominations arise, to have the assistance of an outside ad hoc committee. The Advisory Committee is requested to consult with the Director on the persons to be selected for membership on such an ad hoc committee and to report back to the Faculty."

The details of this procedure remain to be worked out, and at the next meeting of the Advisory Committee, which will now be on Tuesday, the 20th, we will be dealing with it.

As you see from the attached, it will not be Luce but Clifford Geertz whose name will come up first.

Cordially,

Carl Kaysen

Dear Carl :

This is to tell you that I shall not be able to attend the Faculty meeting on October 13.

It seems to me that the procedure you outline in your memorandum would not allow the Faculty to form a fully independent opinion on a new area, or on a nomination in a new area, and to express it, unless it is modified. I have the impression that a number of my colleagues share rather similar views, and I hope very much that a satisfactory arrangement will be arrived at at the meeting.

Sincerely yours

(A. Borel)

September 29, 1969

Dear Armand:

Thank you for your letter of 24 September and the attachment which I have xeroxed and distributed to your colleagues on the faculty committee.

I regret that you have not responded to my request and have instead repeated the proposal you made in the faculty committee. I continue to be unpersuaded that the procedure you suggest is a desirable one. Since it is clear we will have an extended discussion of the matter, I will shortly be responding to you at length.

Cordially,

Carl Kaysen

February 27, 1969

Memorandum for the Record

Conversation with Professor Borel 10:00 a.m. Thursday, February 27,
in the Director's Office

Professor Borel came in to express his concerns on the proposed appointments of Adler and Dashen. He was unconvinced that the extra risk involved in two appointments was justified and repeatedly asked throughout the discussion why we did not simply make one appointment and let the other man go to Princeton. I responded, without saying anything new, in terms of the need for two people in the field, the judgment of the physics Faculty that four or five years from now they will in all likelihood still be the best two people to have, the difficulty of getting any benefit from the man who is full time in Princeton from the point of view of attracting and guiding members. I went over to some extent the history of the decision, pointing out that I had started at the position he now held--namely, that we should appoint one--and had, through discussion of the reasons, become convinced of the utility of taking the extra risk, which I acknowledged, and appointing both.

Borel left saying he might write a letter. The tone of the discussion was friendly and reasonably relaxed.

Faculty - Dyson

June 12, 1968

Memorandum for the Record

Subject: Discussion with Professor Borel on June 10
at 3:00 P.M. in the Director's Office on
Faculty procedures

We discussed future processes for decision-making in the Institute. Professor Borel expressed his satisfaction with the way the Architectural Committee had worked and suggested that it might provide a model for further informal communication. We discussed the applicability or inapplicability of some similar committee procedures to the appointment process for the Fourth School. I agreed that it would be worth considering whether to have a Faculty Committee which would serve as a kind of Review Committee for the first few appointments in this School.

We then had a discussion of the Institute's finances, and I ~~tried~~ to say something both of my plans for raising money and my views on what we could safely spend. In the course of this I pointed out the irrationality of the distinction between income and capital gains and also talked somewhat about my programs for raising funds on a ten-year basis for the Fourth School.

Carl Kaysen

P.S.-- June 12, 1968 -- In conversation with Dyson today I reported on my discussion with Borel about appointments in the School of Social Science and invited Dyson to serve on a Faculty Committee on these matters if one were created. I indicated that I was still unclear as to whether I wanted one, recognizing advantages and disadvantages. Dyson said he would be happy to serve.

C.K.

December 7, 1967

Dear Armand:

Thanks for your note. I am glad to approve your leave for three weeks of the second term of this year from January 8, to attend the Colloquium in Bombay.

With best wishes,

Cordially,

Carl Kaysen

Professor Armand Borel
Institute for Advanced Study

January 30, 1964

To: Professors Beurling, Borel, Gödel, Harish-Chandra,
Selberg, Weil, Whitney

From: D. Montgomery

Dear Colleagues:

Dr. Milton Rose of N.S.F. called yesterday and said:

1) The grant for Borel is definite, but it is not likely that this kind of grant can be made again. Currently the feeling is that such a matter should be handled by a Senior N.S.F.

2) Our other requests will probably turn out as follows: Each of the two contracts will be given \$53,400 per year for a two-year period beginning February first. He hopes and expects that this rate will be raised to current levels for the second year. He also suggests that we apply soon for a grant of \$50,000 per year to begin September first. Names suggested were Hörmander and Harish-Chandra. He is aware that our grants are distributed by the faculty in mathematics as a whole no matter in whose name they may be. He apparently hopes to do at least something additional for the Institute by this device.

Sincerely yours,

Deane Montgomery

NATIONAL SCIENCE FOUNDATION

WASHINGTON, D.C. 20550

JAN 27 1964

Dr. Robert Oppenheimer, Director
The Institute for Advanced Study
Princeton, New Jersey

GP-2403

Dear Dr. Oppenheimer:

It is a pleasure to inform you that the sum of \$7,500 is granted by the National Science Foundation to The Institute for Advanced Study for the support of research entitled "The Arithmetic Theory of Algebraic Groups." This grant is for a period of approximately six months beginning January 2, 1964 and is under the direction of Armand Borel, School of Mathematics.

As funds are needed to carry out the purpose of this grant, please include your funding requirement in the Monthly Cash Request Form, No. 4-49.

This grant does not include an allowance for indirect costs.

The grantee shall furnish to the Foundation promptly a written disclosure of each invention conceived or first actually reduced to practice in the performance of work supported by this grant, together with a statement specifying whether or not foreign and/or domestic patent applications will be filed. Upon application for any patent on any such invention, the Government shall be granted an irrevocable, royalty-free, nonexclusive license for use of such invention for governmental purposes throughout the world (including use pursuant to any treaty or international obligation of the United States). In those countries where a patent application is not to be filed, the Foundation may file for such patent on behalf of the Government. In any case, whether or not a patent is to be filed, the Foundation may arrange for the invention to be described in a printed publication.

This grant may be revoked in whole or in part by the Foundation after consultation with the principal investigator and the grantee. Such revocation shall not affect any commitment which, in the judgment of the Foundation, had become firm prior to the effective date of the revocation. Funds not committed by the grantee prior to the conclusion of the work contemplated under this grant shall be returned to the Foundation.

The Foundation requires that this grant be administered in general accordance with the Foundation's policies for research grants as stated in "Grants for

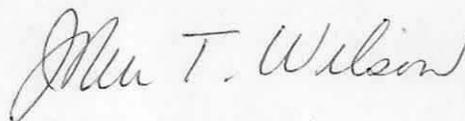

Dr. Robert Oppenheimer, Director

2

Scientific Research," June 1963, as amended, and in conformity with the attached budget summary and other understandings reached between the Foundation and the grantee relating to this grant.

Please acknowledge acceptance of this grant and include in your reply a reference to the grant number.

Sincerely yours

THE INSTITUTE FOR ADVANCED STUDY
PRINCETON, NEW JERSEY

OFFICE OF THE DIRECTOR

29 March 1963

Dear Dr. Grad:

The Institute for Advanced Study asks the National Science Foundation for a grant for Armand Borel, who is a professor in the School of Mathematics at this Institute.

Professor Borel hopes to spend the period from January 1 to June 30, 1964 at the College de France in Paris. His own account of the principal reasons for this project reads:

"My main field of work at present is what may be called the arithmetic theory of algebraic groups, as described in my Stockholm address, which aims at studying systematically certain discrete subgroups of algebraic groups, called arithmetic groups, so as to develop a framework in which certain parts of classical mathematics, like the theory of automorphic functions or of quadratic forms, and their interrelations, would find a natural place. Various aspects of this program (which, in many respects, appears still to be in the beginning stage) arouse much interest in Paris, and my interest in going there is twofold. On the one hand, I would appreciate giving a regular set of lectures to a no-doubt interested audience, on the other hand, I would benefit from prolonged contacts with several mathematicians there, notably Godement, Grothendieck, Chevalley, Cartan, Serre (with whom I have in fact a joint work in progress). Godement has been interested for a long time in the more analytical aspects of these questions, and Serre is now lecturing at the College on some of the more algebraic sides of these problems. Grothendieck has recently proved theorems on algebraic groups by means of his theory of schemes, and I believe that the latter will be an important tool in studying algebraic groups over function fields."

The sum of \$7,500 would be adequate to enable him to teach and work at the College de France without financial sacrifice.

We would be glad to recast this application in another form if that would be helpful to you, or to its success.

With best wishes,

Robert Oppenheimer

THE INSTITUTE FOR ADVANCED STUDY
PRINCETON, NEW JERSEY

SCHOOL OF MATHEMATICS

March 11, 1963

Dear Dr. Oppenheimer:

Recently, I have been offered a visiting professorship at the Sorbonne, Paris, from January to June 1964, and I would like to accept it.

My main field of work at present is what may be called the arithmetic theory of algebraic groups, as described in my Stockholm address, which aims at studying systematically certain discrete subgroups of algebraic groups, called arithmetic groups, so as to develop a framework in which certain parts of classical mathematics, like the theory of automorphic functions or of quadratic forms, and their interrelations, would find a natural place. Various aspects of this program (which, in many respects, appears still to be in the beginning stage) arouse much interest in Paris, and my interest in going there is twofold. On the one hand, I would appreciate giving a regular set of lectures to a no-doubt interested audience, on the other hand, I would benefit from prolonged contacts with several mathematicians there, notably Godement, Grothendieck, Chevalley, Cartan, Serre (with whom I have in fact a joint work in progress). Godement has been interested for a long time in the more analytical aspects of these questions, and Serre is now lecturing at the College on some of the more algebraic sides of these problems. Grothendieck has recently proved theorems on algebraic groups by means of his theory of schemes, and I believe that the latter will be an important tool in studying algebraic groups over function fields.

I do not know yet exactly how much I shall receive from the Sorbonne. From the indications received so far, I would estimate it at about \$5,000. In view of the running expenses here, this is of course not enough and I would like this to be supplemented up to about my usual salary. I am therefore asking for a leave of absence for the Spring Term 1964, and as well for a part of my salary, about \$7,500, for instance in the form of an N.S.F. contract through the Institute.

Sincerely yours,

A. Borel

To: The Faculty

From: A. Beurling, A. Borel, D. Montgomery, M. Morse, A. Selberg, A. Weil

As far as any one of us can remember, we have been guided primarily by the rule of always making the best choices we knew how to make from among our fellow-mathematicians. None of us has ever been aware of any agreement or tradition that could validly interfere with this cardinal principle.

Nothing could be more fatal to us than any visible departure from it; it is largely because we have followed it consistently, and because this has been widely understood and acknowledged, that the Institute has achieved its unique position in the mathematical world.

On the present occasion, we have been gratified to find that this policy has led us to give recognition to the increasing stature of the American mathematical school, which the Institute has in no small way helped to develop.

We do not wish to dictate policy to other groups at the Institute. At the same time, we greatly fear that any attempt to interfere with this principle of ours, on grounds of expediency and appeasement, would have the most serious consequences for us and for the Institute as a whole.

The Institute for Advanced Study

Dear Professor Borel:

Dr. Oppenheimer has asked me to write you about your pension arrangements. At the meeting of the Board of Trustees held in Princeton on April 6 and 7, the Board voted to increase faculty salaries to \$25,000 and increase the minimum guaranteed pension through TIAA-CREF to \$15,000.

The standard 5% contribution by the professor matched by a 5% contribution by the Institute for the balance of your tenure as an active professor will produce this minimum guarantee of \$15,000.

You should know also that the Major Medical contract with TIAA has been modified to reduce the deductible after Blue Cross from \$200 to \$100.

Cordially yours,

Minot C. Morgan, Jr.
General Manager

MCM:lw

Attached to Minutes March 20

March 11, 1961

Dear Deane,

Many thanks for your letter. Of course, I shall not try to discuss from here the particulars of the two nominations under consideration now; nevertheless, I would like to make two general remarks.

1. It is imperative that we consider only first rate scholars. At the Institute there is no inherent obligation to have at all times a full-sized Faculty or a given field represented. It is therefore our privilege, and our duty, not to let anything stand in the way of quality. It is of course useful to have in both Schools first hand knowledge of a wide sector, but this is not essential, and this consideration should come into play only when choosing between two otherwise equally qualified scholars. Besides, recommendations and views of a good, but not outstanding, specialist are often of limited interest, as we all know, so that coverage for the sake of coverage is essentially self-defeating. I am therefore in principle against the nomination of any man, of whom I know, either first hand or from a reliable source, that he is not really first rate, but just happens to be the best available scholar in his field of work.

2. I am also among those who believe that the Faculty should be limited to its present size for at least the next few years, and would go along with any general agreement to that effect. However, this merely reflects my feelings towards the Institute as a whole and is not dictated by a shortage of outstanding mathematicians, who might be available, and would be fully qualified in my opinion to be in our Faculty; so that we should of course reserve our freedom in case no such agreement can be reached.

Sincerely yours,

/s/ A. Borel

Dear Dr. Borel:

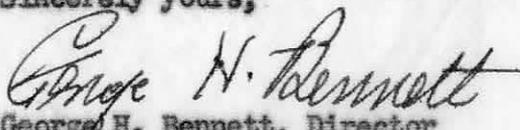

I am pleased to inform you that The Ford Foundation has authorized an award to you under its Travel and Study Program. The Foundation wishes to provide you with an opportunity to lecture in mathematics at the Tata Institute in Bombay and to visit mathematics departments at other universities in India.

Your award, which is for a period of six months, provides a supplemental allowance of \$11,250 in lieu of salary while you are on leave from the Institute for Advanced Study from January to July, 1961. We understand that travel and other expenses will be provided from another source.

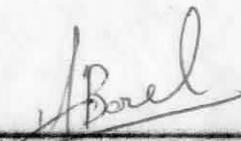

At the request of the Foundation, the Institute of International Education (IIE) will administer the grant and make its services available to you in arranging your travel. Further communications in connection with your award should be addressed to Mrs. Clarice R. Ludwig, Institute of International Education, 1 East 67th Street, New York, who is administering your program.

If the terms of award as outlined above are acceptable to you, please sign and return to the Institute one copy of this letter. May we take this opportunity to wish you an interesting and rewarding visit to India.

Sincerely yours,

George H. Bennett, Director
Department for Asia-Africa
