Dear Sir:

We are preparing for publication a biology textbook to be used in Canadian schools, grade 10. The text, called simply Biology, will be hard cover and will include several photographs and illustrations.

Our authors, John Reimer and Bill Wilson (biology teachers in Ontario) would very much like to use a photographs of Albert Einstein in their text.

Would your institute have a color slide or print on Mr. Einstein which we could use for a few months? Or do you know where we might obtain one?

I look forward to your reply and I appreciate any help in this matter.

Yours very truly,

Magee Carney (Ms.)

Oberstudiendirektor Dederichs Albert-Einstein-Gymnasium Am Schulzentrum 14 4044 Kaarst 1 Federal Republic of Germany

Dear Professor Dederichs:

Thank you for your letter of December 4th, concerning the Albert-Binstein-Gymnasium. I regret this late acknowledgment of your letter but it had been directed to Princeton University rather than the Institute for Advanced Study. Professor Einstein was not associated with the University but rather with the Institute, which is an autonomous body not connected in any way to Princeton University. For your information I enclose a copy of our current brochure which explains briefly the structure and work of the Institute.

I have taken the liberty of forwarding your letter to the Trustees of the Einstein estate, who I am sure would be pleased to know something of the Albert-Einstein-Gymnasium.

With best wishes.

Sincerely yours,

Aida L. La Brutte Secretary to the Director

Rector

of the University in

Princeton | New Jersey

USA

Your Magnificence,

on 1 st January 1974 teachers, pupils and parents, together with the municipality of Kaarst gave the name of "Albert-Einstein-Gymnasium" to the local school.

This is the reason why I should like to come into contact with your university, as I may suppose that your university has a strong feeling of liability for the cultivation of Einstein's heritage.

Our local school is highly interested in

- a) information about scientific works dealing with Einstein,
- b) information about groups and associations spending a lot of time on the cultivation of Einstein's heritage.
- c) personal contacts of professors and students of your university with teachers and pupils of the "Albert-Einstein-Gymnasium".

I should be glad if you had the same interests and could send me a favourable answer.

I should like to give you the following information about our local "Albert-Einstein-Gymnasium":

The school lies in the rapidly growing municipality of Kaarst with about 35.000 inhabitants situated in the middle between the large towns of Düsseldorf, Neuss, Krefeld and Mönchen-Gladbach. Because of the parents of the pupils who primarily work in Düsseldorf (a distance of 12 kilometers), Kaarst ist closely associated with the capital of North-Rhine Westphalia. Kaarst is a merely residential municipality. Many of the boys and girls of our school were born in Düsseldorf.

The "Albert-Einstein-Gymnasium" was founded in 1966 and has 1452 schoolboys and schoolgirls at the present, who can gain their university qualification (leaving examination) in 9 years - after 13 scholastic years altogether. The pupils are taught by 79 teachers.

Am Schulzentrum 14

The Ministers of Culture in the Federal Republic of Western Germany decided on a reform of the upper classes some years ago. This reform is valid for our school, too. According to the name of our school a special emphasis is on the field of mathematics an the natural sciences, furthermore on the field of languages (English, Latin, French and Russian) and sociology.

I should be very glad to receive your answer.

Yours very truly

(Dederichs)

Dr. Marten Goulbergh, J.P. P.O. Box 42 East Brighton 3187 Victoria Australia

Dear Dr. Goulbergh:

Your letter of 8 April has been forwarded here because the Einstein archive is at the Institute, and Professor Einstein's secretary is at work on them here. I have shown your letter to her, and she tells me that Mr. Einstein's daughter Mari died in 1951 and her husband a year later. They had no children. Your best contact is the one you mention, that with Mrs. Steinthal.

Although this may not help you, perhaps it will save your having to search further.

GP: DrMG

4008 The Director

Dear Sir,

You certainly will be surprised to receive this letter from"DOWN UNDER" and I would be very grateful indeed if it would be possible to enlist your co-operation in the following matter.

First of all may I advise that my letter concerns the family of Prof. Albert Ein stein, because we are trying at the moment to find out of how many are still alive from our families. The father Herman Einstein had two children namely Albert and Mari and we are related via Pauline Einstein born Koch - we do know that Albert had died but we are not certain where to find Mari born 18.11.1881 who married Mr. Paul Konrad Winteler. We are directly connected via the family Koch, Victor and Steinthal and during my last visit (May 1971) to London Mrs. Steinthal is still alive and very anxious too to establish connections to the Einstein Family and its children.

I am fully aware of the fact that my letter concerns actually a private matter and the question would be if you would be so kind to let me have the addresses or any address where it would be possible to establish a direct contact with the members of the Einstein Family.

For your interest in this family matter and co-operation I would be deeply

grateful and remain with kind regards

sincerely yours

November 23, 1971

Dear Miss Dukas:

The Berkshire Life Insurance Company wishes to use in one of its sales promotional pieces a picture of Professor Einstein which appeared in "Family of Man" on page 125 (1955) taken by Ernst Hass. The Museum of Modern Art, whose book it was, have referred the Insurance Company to the photographer, but he is not at the phone number given. Could we, therefore, give the necessary permission and produce any information about how the picture could be obtained?

The answer is to be given to Mrs. Vincent of the Insurance Company at 413-442-6951, extension 211. Could you handle this? I would appreciate it.

Sincerely,

Miss Helen Dukas Institute for Advanced Study

April 29, 1966

Princeton University Trenton, New Jersey

Director of Public Relations:

I am seeking a bit of information and wonder if you might care to give it to me.

What was Prof. Einstein's salary at the University?

The reason I would like this figure is to better enable me to point out to many of our local public school teachers that the teaching profession should be guided by a principle higher than the size of paychecks.

I have reason to believe that Dr. Einstein's salary was quite modest.

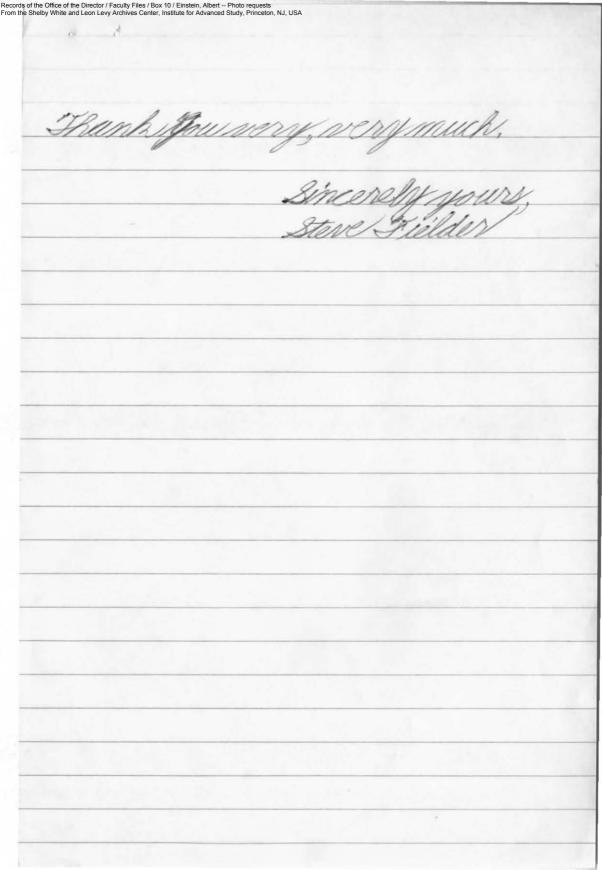

May I look forward to your humble reply soon?

The Albert Einstein Institute At Princeton University Princeton, New Jersey

Attention: Head Director

Dear Sir:

I am a seventh grade student at the School of Practice at the State University here in Buffalo and I have selected to do my yearly report on Albert Einstein. Since Mr. Einstein lived in Princeton and visited the university many times I thought that I might be able to obtain pictures of Mr. PEinstein free of charge. Also, if possible some information on his life and theories in which a seventh grader could understand.

I did not know whether I should write you or the Chamber of Commerce but I figured you probably could obtain the pictures easier from the Chamber of Commerce than myself.

Thank you for your cooperation and an immediate reply. (Within 6 weeks at the latest if possible) I hope I am not too demanding but I do need the informatiom listed above a great deal.

Sincerely,

Richard Levin

Those people have approached me also and I gave them addresses where they can obtain some of the material they would like(a collection at the E.T.H. in Zuerich f.i.) but that we here are not able to comply. I have seen the Tolstoi book —it is really very beautifully done. If you answer them you may just refer to their correspondence with me and Miss Einstein.

Helendulous

did not are since lies D. had written

Miss Dukas.

As you know, we do not keep a picture file. Do you want to respond to this letter? If not, pls. send it back and I will just say that we cannot help.

471 Référence MTG/JL

Dear Sir,

Six years ago, Realites Magazine and the Hachette Publishing Company launched a collector's series called "Génies et Réalités" which has been very enthusiastically received by both the public and the critics.

The purpose of this series is to "resuscitate" great men whose works have marked our civilization and our time, whether artists, statesmen orscholars. Each book is divided into several chapters written by differents authors. In effect, we try to bring together different points of view about the individual hero, examining the successive stages in his intellectual development and the various aspects of his work.

Following this pattern, we have already published twenty-two volumes devoted to, among others : Mazarin, Balzac, Baudelaire, Shakespeare, Napoléon, Mozart, Leonardo da Vinci, Gauguin, Michelangelo, Delacroix, Toulouse-Lautrec, Saint-Exupéry, Goya, Tolstoï and Camus.

We are at the present time in the process of preparing a volume on the great scientist Albert Einstein and have already obtained the collaboration of M.M. Theo Kahan and R. Nataf of Académie des Sciences de Paris, M.M. Louis de Broglie and Louis Armand de l'Académie Française, of the philosopher François Russo and of the well-known critic Pierre Henri Simon. These names may give you an idea of the type of homage we want to pay Albert Einstein.

Since high-quality, evocative illustrations play a major role in the presentation of our "Génies et Réalités" collection, I am taking the liberty of writing to ask if you would be willing to send us any photographs or drawings that would help us, bring Albert Einstein alive for our readers. The following list will give you an indication of the kind of photographs we are looking for :

His childhood in Buchau, Munich, Switzerland;

His youth in Zurich and Berlin ; His life in Princetown ; Portraits of him as a child and an adolescent ; Any anecdotal photographs about him.

As soon as we receive your reply, which we hope will be favorable, we will, in agreement with you, settle the matter of publication rights.

Yours very truly,

M.T. GRIFFOUL

Dear Mr Del ong,

We are looking for a photographic documentation about the great scientist Albert Einstein to illustrate a book : "EINSTEIN" in our Collection "Génies et Réalités".

Could you kindly tell us to whom we must applied in Princeton University to get good photographies black and white and color of Einstein, his family, his house, his conferences, his youth and childhood if possible.

We would like very much to get in touch with Einstein's sons, his daughter Margot, and his son in law: Professor Marianoff. Could you kindly communicate their addresses to us if you have them.

We thank you very much by advance and are looking forward your answer.

Yours sincerely,

M.T. GRIFFOUL

CANADIAN BROADCASTING CORPORATION

Montreal, October 28th 1965.

The Institute for Advanced Study, Office of the Director, Princeton, New Jersey, U. S. A.

Dear Sir:

The French Network of the Canadian Broadcasting Corporation in Montreal has produced last year in cooperation with NASA, 32 television programs on the Space Age. This series aroused great interest among the public and particularly among the juvenile audience. Consequently our educational TV section is again working this season on a more extensive survey of the achievements of astronautics.

We know from last year's experience that the Space Age appeals to our young viewers through the actions of the pioneers of this era. We think that the best approach to this would be a personalised account made by the men who are deeply engaged in this challenging field.

In the field of Physics, for instance, we intend to devote three complete programs on Professor Einstein and his theory of relativity. Please find included a copy of our schedule for the current season. Last September, we wrote to Dr. Robert Oppenheimer asking him to grant us an interview. Unfortunately he replied that he was unable to accept. We are hoping that you might suggest another person who has known Professor Einstein while he was at Princeton. We feel that it would be of tremendous interest for our public to hear in this person's own words the story of Einstein. From a technical point of view, this contribution to our series might take the form of an interview which would be less time consuming and more lively for our series.

Should this person agree with this procedure, we would send ahead a list of questions and an outline of the programs in which he would appear. The interview would be filmed in French and edited in a way that would allow for an elaborate and detailed illustration with film excerpts, stock shots, photographs and animation.

Last July and August, we were fortunate enough to film an interview with Dr. Wernher Von Braun on the story of rocketry and with the astronaut David Scott on manned space flight. We were able to shoot film of the NASA centers in Cape Kennedy, Huntsville Alabama, Houston Texas, and Greenbelt Maryland.

Should this person agree to grant us an interview, we would be assured of having exclusive material for our series. We can arrange to be at Princeton sometime during the first two weeks in December or any other date that would be at your convenience.

As production assistant I would arrive earlier to discuss all necessary details with you.

Sincerely hoping that this letter will meet with your approval and that we may soon hear from you, I remain

Respectfully yours,

Jacques Brosseau, Production Assistant,

Jarques Bro

Dear Sirs:

There is a picture of Albert Einstein, by Ernst Haas, which was included in the unforgettable "Family of Man" exhibition, of which we would dearly love to have a copy. Is such a thing possible? If so, how much would it cost? Or, if this is a ridiculous idea, do you have other pictures of Einstein which are available?

Sincerely yours,

Mrs. Louis Feldman

Princeton University Princeton, New Jersey

Gentlemen:

Our publishing company is in the process of preparing a series of books on the contributions of different nationalities to the American nation.

The books will conclude with a survey of the contributions of each group to America and some reference to contemporary figures of importance in our national life who have come from the specific group being discussed.

We would like to include the picture of Albert Einstein in the volume THE GERMANS IN AMERICA.

Could your office furnish us with any suitable photos and permission to reproduce the same?

Sincerely yours,

David J. Holdman

Dear Miss Whitaker:

The only local source to which I can refer you for photographs of Professor Einstein is a commercial photographer, Mr. Alan Richards, Princeton-Kingston Road, Princeton, N.J. He photographed Professor Einstein on several occasions.

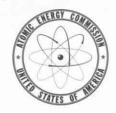

The Institute for Advanced Study (which is not a part of Princeton University), has never had a photograph file. We frequently have requests from people who write that the USAEC Information Office has referred them to us, and I have written several times in the last years in an effort to correct this misapprehension. I would very much appreciate it if you would pass this along to whoever told you that we have a photograph file.

I am sorry that we do not have a picture to send you.

Sincerely yours,

(Mrs. Wilder Hobson) Secretary to the Director

Lentlenen:

In my science project, due at the end of the worth, I am going to show how albert Einstein's formula, E=MC2, led to the discovery of nuclear fission of was hoping to show a picture of the brilliant scientist, but have not yet been able to find one.

I would appreciate it very much if you could possibly send me an 8"x10" photos of Einstein. A lephotograph, I feel, will make the project complete.

Thank you very much for your time and co-

Sob Gerlach

Einstein

16 March 196h

Dear Miss Layne:

Princeton University has referred to us your letter of March hth. Professor Einstein was at the Institute for Advanced Study from its opening until his death; but I am afraid that we cannot supply you with the material you request. We have no public relations department, and maintain no files of literature or photographs of our scholars. You may wish to write to Miss Helen Dukas, 112 Mercer Street, Princeton, who was Professor Einstein's secretary; and for photographs to a local commercial photographer, Mr. Alan Richards, Princeton-Kingston Road, Princeton, who often photographed Professor Einstein.

Sincerely yours,

(Mrs. Wilder Hobson) Secretary to the Director

Miss Marie Layne 17 Chambers Court Clifton, New Jersey

17 Chambers Court
Clifton, New Jersey
March 4th, 1964 JMJ SA

Princeton University Princeton, New Jersey

Att: Public Relations Director

Gentlemen:

Back on Nov. 27th, 1963, I came to your desk in my capacity as writer for leading publications and for your editorial assistance in the preparation of an article on Albert Einstein.

I requested any available literature of Einstein plus several glossy photos, if available, to illustrate my story.

It is my understanding that said material is obtainable through you and free of cost. Also, I must again state that I would not be in a position to return any of this as my publishers wish to retain same on file and which will also explain my inability to accept any on loan. This article will be directed to the high school and college-age level youth.

I do hope to hear from you at your earliest convenience and thank you very kindly for any assistance you may wish to offer.

Best wishes.

Marie Layne, Author

March 5, 1964

Miss Marie Layne 17 Chambers Court Clifton, N. J.

Dear Miss Layne:

I am sorry but we have no recorded your letter of November 27th. Dr. Einstein was at the Institute for Advanced Study which is located in Princeton but is not affiliated with Princeton University. I am forwarding your request to them and trust that you will hear from them in the near future.

Sincerely,

Dorothy Lupichuk Assistant to the Director

Einstein

March 5, 1964

Dear Mr. Morris:

Your letter of March 3 was forwarded to us by Princeton University with the hope that we might be of help to you. However, I am sorry to inform you that we do not keep a file of photographs or general information on Dr. Einstein. Mr. Alan Richards, a local photographer, on several occasions took photographs of Dr. Einstein, and I would suggest that you write directly to him at Princeton-Kingston Road, Princeton.

Sincerely,

(Mrs. J. R. Haymes, Jr.) Office of the Director

Director of Public Relations, Princeton University, Princeton, New Jersey, U.S.A.

Dear Sir,

In connection with the forthcoming publication in London of an International Edition of THE WORLD BOOK ENCYCLOPEDIA, we are interested in obtaining black and white photographs of Albert Einstein; perhaps a photo of him with an equation on the blackboard behind him, or a photo of him lecturing to students, or some other photo showing him "in action", for an article on Nobel Prize winners.

If you could help us in this regard, we would be most grateful. Those photographs not selected for reproduction will be promptly returned if so desired, and a credit line as specified by you will appear beneath those pictures published. We would be obliged if you could attach adequate caption information to the photographs.

Thank you for your attention to this matter, and we look forward to hearing from you in the near future.

Yours faithfully,

Peter Larsen Picture Researcher

Gentlemen:

We are anxious to obtain a glossy print of Dr. Albert Einstein to be run in our picture service in conjunction with a story about him. Here in Washington, we have thus far only uncovered pictures credited to United Press or Associated Press, which we do not use.

Hopefully, you may have one taken by an independent photographer or by the University. We would like a "portrait" shot of Einstein, preferably.

Press Associates is a news service serving exclusively labor newspapers across the country. A portion of our packets are devoted to art, and it is for this purpose that we would like to have the picture. We could return it to you within about a week if this would be desirable.

Thank you for any help you may be able to give us.

Sincerely,

(Mrs.) Gwen D. Offenbacher

3/29/63

Miss B. Matthews, Life Mag. called to check a story in a book they are doing on mathematics. writer Dave Bergamini thinks he remembers hearing this from you in 1954.

It is a story about a Russian mathematician lecturing in Princeton, and being discomfitted by an exchange of formulae on the blackboard with Einstein, later explained by Einstein as: he said that it was like a cup and saucer in space, but it was like two cups and saucers in space.

I said that I had never heard the story; that I would ask you and if you knew it and could verify it we would call her back. If not, we would not call back. NY, LL 6-3505.

She also asked for other Princeton sources on Einstein, and I referred her to Miss Dukas.

Wind Song Charles & Maria Williams R.F.D. #2-Box 212A Mays Landing, New Jersey 20 July 1961

Dear Mr. Richards:

In two letters about other matters, we have had requests for photographs of Einstein. I have informed both that we have nothing, but that I am passing along their request to you. They are:

- l. Mr. Charles Verbeeck, Krijgslaan 122, Wilrijk, Belgium, a student at a technical high school who is writing about "Historical facts in the development of atomic energy".
- 2. Ing. Dott. Guerrino Spinelli, Ravenna, Via Maggiore la traversa n. 23, Italy, a private teacher of scientific and technical studies.

Sincerely yours,

(Mrs. Wilder Hobson) Secretary to the Director

June 2, 1961.

Directors of the Institute for Advanced Studies, Princeton University, Princeton, New Jersey.

Dear Sirs:

Approximately in 1942, I formulated some ideas and had them sent to Prof. Albert Einstein. He was kind enough to invite me to Princeton to discuss them; an opportunity, of which I was unable to avail myself. The onrush of war-later my domestic responsibilities pushed the project into the background.

Now in later years, I feel that I don't wish these thoughts to perish with me; as I myself apparently can do nothing to perfect them.

These ideas involve the construction of a Universal Propulsion Rotor which will produce propulsion on land, on sea, in air, and in space, as it operates on the universal media of centrifugal forces.

A Rotor of this type would exert a continous and unlimited acceleration factor. I need not tell you of the great significance, that a Rotor of this type would have.

Hoping you will afford me an opportunity to go into more detail with you.

I remain,

Sincerely Yours,

JEROME E. GLEICH

3 March 1961

Dear Mrs. Farrell:

Since we do not have a picture file, we are unable to send you a photograph of Albert Einstein. Perhaps you should contact a commercial photographer.

Sincerely,

(Mrs. Raymond Jeffers)

Mrs. Edith A. Farrell 6 Woolsey Avenue Bethpage, L.I., N.Y.

To Whom It May Concern:

I have tried without success to obtain a photograph of Prof. Albert Einstein. I would prefer a picture, suitable for framing, size 8" x 10" if possible.

Of course, I will pay for all costs involved if you are able to supply same.

A self-addressed stamped envelope is enclosed for your convenience. Please may I hear from you soon. Thank you.

Sincerely,

MRS. EDITH A. FARRELL

SCHOOL DEPARTMENT

February 7, 1961

Institute For Advanced Study Olden Lane Princeton, New Jersey

Dear Sir:

We are currently planning the illustrations for a new junior high school science series by Dr. Ellsworth Obourn of the U.S. Office of Education, et al. For that purpose we would like to obtain glossy prints of the subjects listed on the enclosed form. We would appreciate it if you could send us alternative photographs, whenever possible, so that we may make a selection.

The credit line will appear either above or below the photograph. Please indicate the exact wording of the credit line on the enclosed sheet, which is to be returned to us. Also indicate whether or not you wish the photograph to be returned.

Thank you for your cooperation.

Sincerely yours,

D. VAN NOSTRAND COMPANY, INC.

JA/jmp Encl. Records of the Office of the Director / Faculty Files / Box 10 / Einstein, Albert -- Photo requests 9 min Syndrian Sinstein From the Shelby White and Leon Levy Archives Center, Institute for Advanced Study, Princeton, NJ, USA February 5, 1951 Dear Miss Dukas: Dan Coyle of the Princeton Press sent this to me for transmittal to you. The only pictures we of coursehave available are prints of the photos taken by Life, etc. I can write to Mr. Gutterman, if you wish, to say that that is all we have and that he would have to go to Life, Time, Fortune for copies and approval to release them. Professor Einstein, however, may wish to handle this in a different way, and I shall leave that to you to decide. I will do whatever you wish to make it easier for you. Just let me know. Sincerely. Katherine Russell Miss Helen Dukas 112 Mercer St. Princeton, N. J.

Dear Mr. Blomme:

Thank you very much for your interesting letter of 5 February to Dr. Carl Kaysen, and for your offer to sell the painting of Professor Einstein to the Institute for Advanced Study. At the present time we are not in a position to purchase your painting, but thank you for your consideration and will bear in mind your generous offer.

Sincerely yours,

Aids L. La Brutte Secretary to the Director

Dr. Carl Kaysin, Director Institute for Advanced Study Princeton New Jersey 08540

U.S.A.

Monsieur,

Je me permets quels mots sur mon ami intime Albert Einstein Grand Savant.

Lors du regime en Allemagne de Hitler, il s'est enfui de ce pays pour venir se

cacher à Cocque sur Mer, Belgique en 1933.

Beaucoup d'artistes même de tres
loin venaient dans l'espoir de faite son
portrait, mais c'était une chose de taite

qu'il n'acceptait de personne.

dans les journeaux que fis conaissaence avec une histoire même parrue en rase campagne peignaut une chêvre, (elle n'en sortait pas).

Etant directeur de l'Académie d'Ostende en passent justement par le j'ai aidé a sauver ce tableau, dont elle était tres reconnaissant.

J'apprenais donc à l'improviste sue c'était à la fille même du Savant que je donnais une leçon de peinture.

Par ce fait Einstein chaque jour chez moi, Dique de Mer à Cocque s/m, pour jouer du violon accompagné par moi etant en même temps du'artiste peintre un peu pianiste.

Il y a un livre pà écrire sur son séjour de plusieurs mois sur la côte Belge (Visité du Ministre President de France, visité auprès de la Reine Elisabeth de Belgique, ci joint une foto devant le portrait peint par moi de Einstein).

Pour autant que cela peut Vous interesser, je pourrais Vous expédier le portrait à l'huile du Savant valeur deux mille dollard (le tableau vaut deux fois ce prix). d'Après Einstein je suis le seul peintre au monde pour pui qu'il a voulu poser personellement.

Je possède également des eaux-fortes moitié litho (dimension à p.p. 80 sur 60 centimetres, pour deux cent dollars, la pièce.

Je pourrais donc eventuellement Vous envoyer plusieures exemplaires.

Du portrait même je pourrais Vous expédier une seul pièce. Je reste bien respecteusement Votre,

Alfons Blomme Pur Blowy
