

Hubbard, Deborah

THE INSTITUTE FOR ADVANCED STUDY  
PRINCETON, NEW JERSEY

May 8, 1941

Dear Mr. Aydelotte:

Miss Deborah Hubbard came to us as a volunteer worker last autumn on November 18. We began paying her a nominal honorarium of \$60 a month on March 1. She has been giving such complete satisfaction that we feel the time has come to increase this honorarium to \$100, <sup>as of June 1</sup> if Miss Hubbard is willing to devote a portion of her summer to the bibliography, syllabus, and book of readings on which we are now engaged. I have these funds available under a Carnegie Corporation grant but should dislike to authorize the expenditure without your approval. Would you tell me what your wish is?

Sincerely yours,

OK TA - Car fund   
Edward Mead Earle

THE INSTITUTE FOR ADVANCED STUDY  
PRINCETON, NEW JERSEY

February 20, 1941

Dear Mrs. Bailey,

With the approval of Mr. Aydelotte I am requesting that Miss Deborah Hubbard be put on the Institute pay roll as of March 1 at a stipend of \$60 a month to be charged to the Carnegie grant under the heading "research assistance." This stipend is to continue until May 30 when other arrangements will be taken under advisement.

Sincerely yours,

A handwritten signature in dark ink, appearing to read "Edward M. Earle", with a long, sweeping horizontal flourish extending to the right.

## PRINCETON - NEW JERSEY

April 30, 1942

Dr. Frank Aydelotte  
Institute for Advanced Study  
Princeton, New Jersey

Dear Dr. Aydelotte:

Perhaps the enclosed tracing of the tax map will be of some assistance to you on the Hun School property. The figures I gave you on accommodations for students, I now realize, applied only to the property at 100 Stockton Street and not to the main building at 110 Stockton Street.

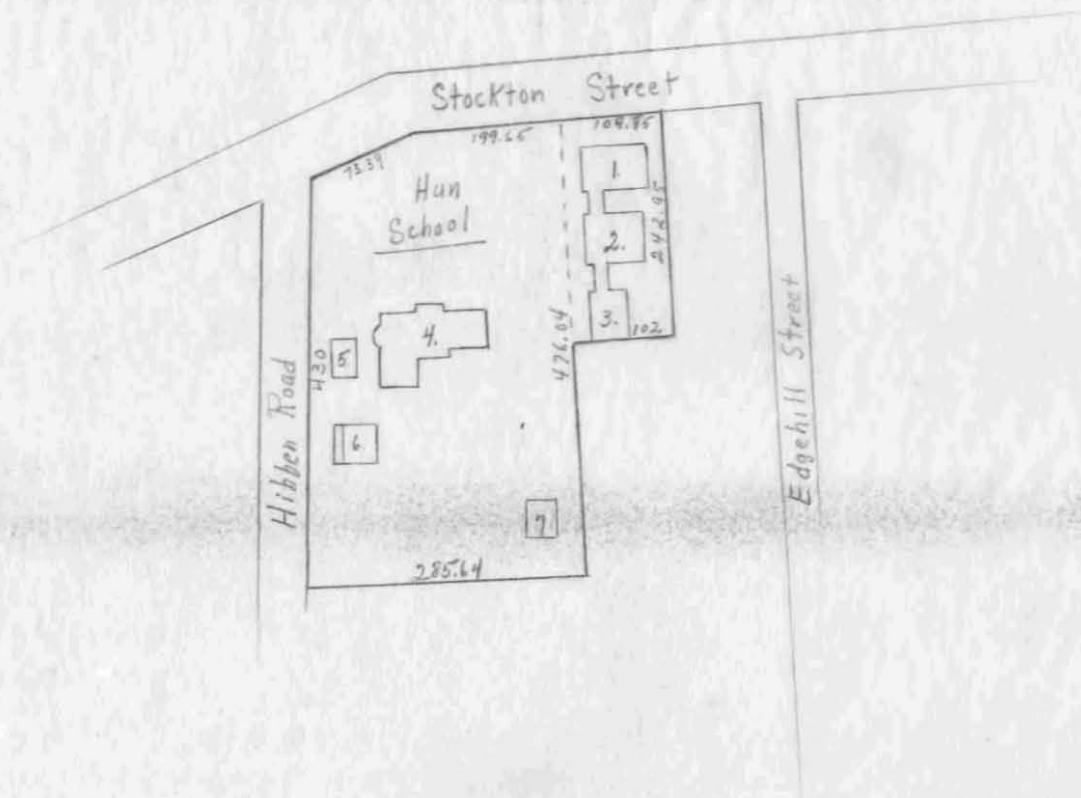

The capitalization consists of \$71,600 of bonds exclusively on this property, and a total of 27,599 shares of stock of the corporation which also owns the gymnasium and the tennis courts, but has very little equity in the latter two properties. The par value of this stock is \$5.00 per share, making a total of \$137,995.00 for the stock and \$71,600.00 for the bonds, or a grand total of \$209,595.00 at par. This does not include current indebtedness.

I understand that the properties are assessed for taxes at \$69,200.00 for 100 Stockton Street, \$69,500.00 for 110 Stockton Street, and \$7,700.00 for the infirmary. This totals somewhere near the minimum figure at which I suggested it would be worth while getting it.

Sincerely yours,

A handwritten signature in dark ink, appearing to read "Harrison M. Thomas". The signature is fluid and cursive, with a large, sweeping "H" and a long, trailing flourish at the end.

HARRISON M. THOMAS  
President

See attached legend

LEGEND

Nos. 1-3      100 Stockton Street

Lot 104 x 240. This lot does not have the required space for conversion into apartments under the Zoning Ordinance.

This entire building is of brick and stucco construction. Has accommodations for four instructors and 93 students. Rooms are distributed as follows:

1. Basement: boiler.

1st Floor: 1 bedroom and bath  
2 double bedrooms  
16 single bedrooms  
showers and lavatories

2nd Floor: 2 single bedrooms and bath  
3 double bedrooms  
15 single bedrooms

3rd Floor: 1 bedroom and bath  
17 single bedrooms  
showers and lavatories

2. Basement: coal boiler etc.  
1st Floor: 6 class rooms  
2nd Floor: 4 class rooms

3. Basement: Chemistry Laboratory  
Office  
Locker Room  
Help's Quarters

1st Floor: 1-3 rooms and bath  
4 double rooms  
2 single rooms  
showers and lavatories

2nd Floor: 1 bedroom and bath  
4 double rooms  
4 single rooms  
showers and lavatories

3rd Floor: 3 double rooms  
5 single rooms  
showers and lavatories

No. 4      110 Stockton Street

Brick and cinder block construction -- slate roof.

Basement: Recreation room, laundry, boiler room,  
ice plant etc.

1st Floor: Principal's office with lavatory  
Reception room  
4 private offices, dining room, kitchen

2nd Floor: 2-1 bedrooms and bath  
3 double bedrooms  
2 single bedrooms

3rd Floor: 5 double bedrooms  
14 single bedrooms  
showers and lavatories

No. 5      Infirmary

Frame construction.

Basement: boiler room

1st Floor: Waiting room - office  
3 single rooms  
1 double room  
1 bath

2nd Floor: 1 bedroom with bath  
1 double room  
3 single rooms

No. 6      Cottage

Basement: Boiler

1st Floor: Living room, dining room, kitchen, porch,  
servant's room and bath

2nd Floor: 4 bedrooms and bath

No. 7            Garage

In addition, there is a building between No. 6 and No. 7 containing 3 apartments.

The lot on which No. 4 (110 Stockton Street is located certainly has the required space for conversion into apartments, but the latter would have to be approved by the Zoning Board unless used primarily for school purposes.

NATIONAL ACADEMY OF SCIENCES  
NATIONAL RESEARCH COUNCIL

2101 CONSTITUTION AVENUE, WASHINGTON 25, D. C.

10 January 1957

Memorandum to

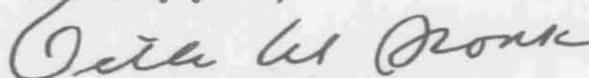

Members of the National Academy of Sciences  
Members of the National Research Council  
Members of Committees

Following approval by the Governing Board of the Academy - Research Council of a proposal that we assist fellow scientists, scholars, and engineers among the escapees from Hungary who seek refuge in the United States, we have established offices at Camp Kilmer, New Jersey, and in Washington to help place such individuals.

Arrangements have been made at Camp Kilmer to identify arrivals with advanced scholarly and professional training. From experience thus far it appears that a substantial number and variety of persons with those qualifications will be found. We are making every effort to explore as many possibilities for their placement as possible, so that the best interests of the individuals and of the scholarly and professional community of the United States will be served.

We have prepared the attached statement to guide those who wish to offer opportunities for employment. We are sending it to you with the thought that you may wish to arrange to send us information with regard to openings in your own institution, or to pass it along to others who in your opinion should have it.

Sincerely yours,

Detlev W. Bronk  
President

NATIONAL ACADEMY OF SCIENCES  
NATIONAL RESEARCH COUNCIL

2101 CONSTITUTION AVENUE, WASHINGTON 25, D. C.

10 January 1957

HUNGARIAN ESCAPEES WITH  
SCIENTIFIC, SCHOLARLY, OR PROFESSIONAL TRAINING

In cooperation with the President's Committee for Hungarian Refugee Relief the National Academy of Sciences - National Research Council has established an office at Camp Kilmer, New Jersey, to help identify and place individuals having advanced scientific or other scholarly or professional training among those who have escaped from Hungary and sought safe haven in this country.

Escapees are arriving each day at Camp Kilmer by plane and ship. Many possess high scholarly or professional qualifications. Vice President Nixon's recent report states that more than 1,000 of the 9,253 who had arrived in this country by December 31 are "professional, technical, and kindred workers". This proportion may well be encountered also among the thousands who are now on their way or have arrived since December 31. Furthermore, it is quite possible that additional thousands will be admitted beyond the present authorized limit of 21,500.

The Academy - Research Council is endeavoring, in cooperation with other scholarly and professional organizations, to assist in welcoming the escapees and aiding them to find suitable placement where they can make full use of their talents to their own satisfaction and to the benefit of the institutions and communities with which they become associated.

To that end the Academy - Research Council will be glad to be advised of openings that may be available for persons of advanced training in any field of scholarship or the professions, particularly openings that require the doctorate or an advanced engineering degree. Every effort will be made to bring such opportunities to the attention of those among the Hungarians who appear to be qualified, and to provide a channel for direct contact between the individuals and the institutions where the openings exist.

Because of the limited facilities at Camp Kilmer it is necessary to place the escapees as rapidly as possible. An effort will be made, however, to bring known openings to the attention of all available individuals who appear to be qualified and to give each individual an opportunity to consider a variety of employment possibilities. The American Council for Emigrees in the Professions is cooperating with the Academy - Research Council in this effort, as are other national organizations.

Arrivals in this country from Hungary are in two categories, those with visas for immigration (some 6500) and those admitted on a "parolee" basis. In the first case the law requires a sponsor who will guarantee that for a period of one year the individual will not become a public charge. In the second case the legal requirement is less strict, but some degree of responsibility must be assumed. The necessary arrangements in both cases are usually made in the community where the individual is placed, often with the help of local welfare agencies.

Some language training courses for escapees who do not speak English have been arranged and others are being considered. Many who do not speak English speak French or German.

In any information provided with respect to openings the following items should be included:

1. Name and location of institution
2. Description of position available; field of work; nature of duties (e.g., teaching, research, development, engineering, management)
3. Level of salary or other support
4. Estimated starting date and duration of employment
5. Language requirements, and availability of local training in English if necessary
6. Name, address, telephone of your representative for further negotiations
7. Housing available (some escapees are accompanied by wife and children)
8. Group or organization willing to act as sponsor, if known
9. This information previously given to \_\_\_\_\_
10. Other information that you consider helpful

Under existing circumstances placement must be handled rapidly. To be of greatest assistance, therefore, information on employment opportunities should be submitted promptly, and should be kept up to

date as circumstances change. Information should be sent in duplicate,  
the original to

National Academy of Sciences - National Research Council  
2101 Constitution Avenue, N.W.  
Washington 25, D. C.  
Attention: Office of Scientific Personnel

and a carbon copy to

National Academy of Sciences - National Research Council Office

Telephone numbers:

Washington: Executive 3-8100, extension 226 or 266

Camp Kilmer: Charter 9-5883, extension 22 or 23  
New Brunswick, New Jersey

10 January 1957

Telephone call from Dr. Trytten, National Academy of Sciences, who is at Camp Kilmer working with the Hungarian refugees. He called to ask RO's help in finding volunteers qualified in Hungarian and in the sciences, to interview scientists for the purposes of screening, identifying, and placement. Was very disappointed to hear RO away. I said I would ask around and try to find people. Consulted Prof. Alföldi, who suggested Dr. Wigner. Called him, and his secretary said he was busy with preparations to leave for sabbatical. Called Caroline, who consulted with Professor Morse. Morse called Trytten, and has lined up Dr. Bott to go down one day a week for four weeks. Morse is going to keep trying for more people (possibly Dr. Sion) after Bott has been down and reported.

Dr. Trytten said he had also called Dean Taylor.

Prof. Morse thinks it possible that there may be Hungarians who could appropriately come here as temporary members.

Dr. Trytten's telephone number: CHarter 9-8541

Law Offices  
HENRY T. HUNT  
60 East 42nd Street  
NEW YORK

H. T. Hunt  
C  
O  
P  
Y

November 2nd, 1932.

Jerome N. Frank, Esq.  
25 Broadway  
New York, N.Y.

Dear Jerome:

Perhaps Dr. Flexner will consider suggestions for the faculty of the projected university even from a layman. However, I am sure many scholars will back my nominee for the chair of anthropology or have already done so. It is Dr. Robert Briffault.

My acquaintance with Briffault's work began with his "Mothers" published, I think, in 1928. This book demonstrated the author's character as well as his scholarship, his tireless search for data, his skill in organizing it, logic in drawing inferences from it, his courage and precision in stating his conclusions, opposed though they might be to prevailing schools or to dominant conventions. He demolished Westermarck and exposed his subserviency to Christian morality. He refuted Malinowski. By so doing he alienated forces controlling British universities. Briffault opposed certain conclusions of Dr. Franz Boas and thereby rendered himself unorthodox in these United States. All this I adduce to emphasize his courage. My belief is he has never written a line

-2-

to please placate or cajole any person or group. He, at least has never "crooked the pregnant hinges of the knee that thrift may follow fawning". And even dissidents to his conclusions on matriarchy acknowledge the value of his discussion in "The Mothers" on the origins of romanticism and its debt to the Arabs.

In "Creative Evolution" Briffault summed up long historical periods and expressed their tendencies in brief compass and with more illumination to the reader than, for example, the tedious volumes of the Cambridge histories, pretentious as they are.

To my knowledge and belief no author of today has done so much as Briffault to enable man to understand himself and the world about him. The chapter in "The Mothers" on the origin of love, distinguishing the sexual and the mating instincts and demonstrating the effect of each, is an example of his clarification of the mysteries of human conduct.

In addition to erudition Briffault's style is clear and vigorous. His scholarship has not damped his vivacity.

I have known him personally for the last two years. From that knowledge I am convinced he would be a most effective teacher. He has no arrogance of scholarship, rather a winning simplicity and patience.

This letter is not an attempt to recount Mr. Briffault's life and achievements, but the expression of a friend who greatly admires him. I know that he had a medical education and practiced as a surgeon before he devoted himself to

-3-

anthropology, that he served at the front during the war with the British army and that he was on the staff of the Encyclopedia of the Social Sciences.

My belief is that he is supremely qualified for the chair of anthropology.

Sincerely yours,

(signed) Henry T. Hunt

November 4, 1932

Dear Mr. Frank:

Thank you very much for sending me Mr. Hunt's very interesting letter, which I shall keep at hand.

I am not sure that the plan of organization which we have adopted is generally understood but for your sake and for Mr. Hunt's enlightenment, may I say that the Institute is to consist of a number of loosely joined schools. We are beginning with the School of Mathematics - beyond that nothing has been determined. There is no necessary or logical order in these matters. Everything depends upon finding the men, as is done in the Collège de France. When we shall reach Anthropology, I do not know, but when the time comes, I shall give careful consideration to Mr. Hunt's recommendation.

Sincerely yours,

ABRAHAM FLEXNER

March 31, 1936

Dr. Abraham Flexner  
150 East 72nd Street  
New York, N. Y.

Dear Flexner:

Bulletin, number five, of the Institute  
for Advanced Study has come and has been read with  
deepest interest.

A big story lies between the lines or,  
perhaps we might say, in the mere list of the staff.

My congratulations go to you.

Sincerely yours,

*Max Farrand*

March 5, 1935

Dear Farrand:

I have just been reading your Seventh Annual Report with the very keenest interest. You are doing a beautiful job, and I am heartened by it because I am myself thinking seriously of taking a further step in the near future by establishing a School of Humanistic Studies. That ought to bring your institution and mine into close connection.

With all good wishes and very warm regards,

Sincerely yours,

ABRAHAM FLEXNER

HARVARD UNIVERSITY  
DEPARTMENT OF ECONOMICS

CAMBRIDGE, MASSACHUSETTS

December 7, 1936

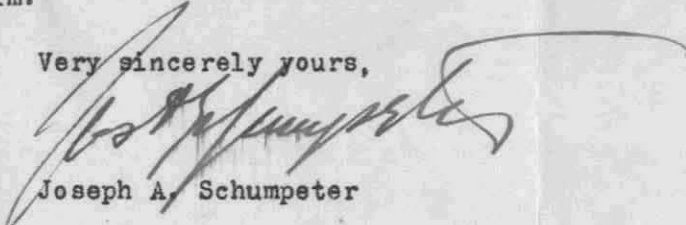

Mr. Abraham Flexner  
Institute for Advanced Studies  
Princeton University  
Princeton, N. J.

Dear Mr. Flexner:

A few days ago I ~~have~~ had a visit from Professor Gerhard Husserl, who years ago, before he was called to Kiel, was my colleague in Bonn. I was then, and have been again, struck by his talent, the width of his philosophical erudition and all that he means for general jurisprudence. I don't know whether you have met him, but it occurred to me that he may be just the type of man you are now recruiting for your Institute.

His remarkable publications have made quite a name for him in Germany and since there ~~is a~~ tendency in this direction in this country, they may before long do so here. I do not know at all what your plans are and I am throwing out the suggestion at the risk of its being entirely off the point. Nor do I know what your policy is regarding temporary appointments, but I do think it might be worth your while to have him at your Institute for, say, a year *in order* to look at him.

Very sincerely yours,

  
Joseph A. Schumpeter

JAS:JB

Husserl

December 14, 1936

Dear Riefler:

I received the enclosed from Professor Schumpeter. Husserl is a young man of philosophical outlook. Just what kind of economics is concealed beneath this philosophical basis I do not know. If you are inclined to see him I can easily get hold of him, but I hesitate to bring him here unless you are interested in a man of his philosophical inclinations.

Always sincerely,

ABRAHAM FLEXNER

Professor Winfield W. Riefler  
69 Alexander Street  
Princeton, New Jersey

AF/MCE

December 14, 1936

Dear Professor Schumpeter:

Thank you very much for your kind note of December 7 in regard to Professor Hüsserl. I saw him a few days ago and I believe that while he was here he had an interview with Professor Riefler. I shall send your letter to Riefler, whose plans are, however, still unformed. As far as he has progressed in his thinking he is inclined to follow the policy pursued here in mathematics, namely, to mark off a section of the economic field and cultivate it with unusual intensity.

It was a very great pleasure to hear from you. The other evening I met Mr. Balogh, who spoke of his days at Bonn with the greatest enthusiasm.

With all good wishes and warmest regards,

Ever sincerely,

Professor Joseph A. Schumpeter

New York City, N.Y.

June 15, 1932.

Dear Sir:

My information concerning the new educational institution which is being started sometime soon, under your leadership, is limited to what I have happened to see from time to time in newspapers and periodicals. I have no exact knowledge concerning how soon it will open or what its scope will be when opened, but I would like to be considered for a position if there should be any available for which I am fitted. A brief summary of my training is:

Graduated from Dartmouth	( A.B. )	1923
--------------------------	----------	------

A.M. from Harvard	1924
-------------------	------

Studied:

Advanced Calculus	( Osgood )
-------------------	------------

Modern Geometry	( Graustein )
-----------------	---------------

Functions of a Complex Variable	( Graustein )
---------------------------------	---------------

Mechanics	( Walsh )
-----------	-----------

Teaching, Union College, Schenectady, N.Y.	1924 - 1930
--	-------------

Some graduate study was available:

Integral Equations

Fourier Series

Analysis ( Bernoulli numbers, Bessel and Legendre functions )

Differential Equations of Mathematical Physics

Functions of a Complex Variable ( following Pierpont )

These courses were all given by D.S. Morse

I also did considerable work - largely elementary in nature - in Electrical Engineering in order to get familiar with the engineering background of certain mathematical problems I was interested in. As a by-product of this I received a E.S. in E.E. from Union.

University of Chicago ( Summer term )

Studied:

Calculus of Variations	( Bliss )
------------------------	-----------

Elliptic Functions	( Bell )
--------------------	----------

IN REPLY REFER TO

REPLYING TO

Differential Geometry ( Lane )  
Bell Laboratories 1930 -  
Studied at Columbia:

Integration in Finite Terms ( Ritt )  
Differential Equations from the Standpoint of Modern  
Algebra ( Ritt )

My interests are much more in a wide knowledge of the field of Mathematics, its relations to other sciences and arts, and in teaching, than in highly specialized knowledge and research. As a result, I doubt if I will ever be a very productive scholar. I do feel certain, however, that I can teach effectively and well. In an institution such as you plan, a large proportion of the students would, presumable, be relatively immature scholastically and a large amount of teaching in Mathematics would be needed even for students in other fields. It is for such work that I think that I would be particularly fitted.

Concerning finances, I imagine I would want about what most people whose interests are primarily scholarly would want; a large salary is of less interest than sufficient to support myself and wife plus security and an opportunity for further study.

Further information concerning me can be obtained, if you are interested, from Professors L.L.Silverman, Dartmouth College, D.S. Morse, A.D.Snyder, or F.J.Burkett, all of Union College, Schenectady, N.Y.

Sincerely yours,

Dear Sir:

I became interested in your institution through the comments of Mr. Albert J. Nock in "The State of the Union" in the American Mercury for February. I secured the identity of your school by writing to Mr. Nock.

I would appreciate it very much if you would send me your catalog or tell me the requirements for admission, the expenses one would expect to have to meet in attending your institution, and more or less what you have to offer.

I thank you very much.

Yours truly,

*Leland Hutchins*

Mr. J. Robert Oppenheimer  
President  
Institute for Advanced Study  
Princeton, New Jersey

Dear Mr. Oppenheimer:

Professor and Mrs. Huxley have told me how greatly they valued the opportunity to have luncheon with you and a number of your colleagues at the Institute last month. I just wanted you to know that we are exceedingly grateful to you for all your hospitality to these visitors.

Sincerely yours,

SHS:rec

Just Gen Hurley  
As from:

The Australian National University  
Box 4, G.P.O. Canberra A.C.T.  
Australia.

February 22nd 1963.

Dear Dr Oppenheimer,

May I thank you most sincerely for ~~the~~<sup>the</sup>  
courtesy and kindness that you showed to my wife  
and myself in entertaining us to lunch so  
graciously and in giving us the opportunity to  
meet some of your distinguished colleagues.

It was, of course, a great privilege for us to  
visit your famous Institute whose ideals we  
repect in our distant southern university and it  
will give me great pleasure to recount to my  
colleagues the details of our visit.

With many thanks,

Yours sincerely

L. G. H. Hurley

Mr. Robert Oppenheimer  
Director  
The Institute for Advanced Study  
Princeton, New Jersey

Dear Mr. Oppenheimer:

Prof. L. G. H. Huxley, vice-chancellor of the Australian National University, is currently traveling in this country with Mrs. Huxley under the auspices of the Corporation. I am enclosing a memorandum which gives something of his background and interests.

Professor and Mrs. Huxley are coming down to Princeton on Wednesday, the 20th, and would like very much to have an opportunity of visiting the Institute that day. I hope it may prove possible for you to see them. As you know, the National University is made up of an Institute for Advanced Study and an undergraduate section known as the School of General Studies. You may recall meeting Prof. Herbert Burton, principal of that School, when he visited the Institute last fall. Professor Huxley would appreciate an opportunity of talking to you and some of your colleagues about some common problems, and needless to say we shall be most grateful if you can spare some time for him. *say face*

Sincerely,

enc

*sent 2/13/63*

We should be very pleased to have Professor and Mrs. Huxley lunch  
with us 12/45 on the 20th at the Institute for Advanced Study.

*Dr. & Mrs.* Robert Oppenheimer

Stackpole secretary, Miss Marjorie Wells,  
called to accept with thanks for the  
Huxleys. They will plan to arrive here  
a few minutes before 12:45 on Wed. 20th.

Background Information  
on

Prof. L. G. H. Huxley  
Vice-Chancellor, Australian National University,  
visiting the United States and Canada  
with Mrs. Huxley on the invitation of  
Carnegie Corporation of New York  
Nov. 27, 1962 - Feb. 25, 1963

Professor Huxley succeeded Sir Leslie Melville as vice-chancellor of the Australian National University in October, 1960. He was previously for a brief period a member of the executive of the Commonwealth Scientific and Industrial Research Organization and until the end of 1959 had been for ten years Professor of Physics at the University of Adelaide. Here he had established a research school distinguished for work in gaseous electronics and the physics of the upper atmosphere and ionosphere.

Born in London in 1902, Professor Huxley went to Tasmania with his parents and there received his early education. Following an outstanding career at the University of Tasmania, he won a Rhodes scholarship at Oxford in 1923 where he entered New College. His Oxford Ph.D. in 1929 was based upon research which laid the foundation for many modern developments in upper atmosphere physics. Returning to Australia in 1929, Professor Huxley served for two years with the Council of Scientific and Industrial Research. He then returned to head the Department of Physics at the University College, Leicester. During the second world war he was a member of the Telecommunications Research Establishment and there organized the training of radar officers in the new techniques of aircraft detection and navigation. Following the war he was for three years reader in Electromagnetism at the University of Birmingham.

Professor Huxley is a foundation member and fellow of the Australian Academy of Science; chairman, National Standards Commission; chairman, Radio Research Board; member of the National Library Council and of the Board of the United States Educational Foundation in Australia. He is the author of A Survey of the Principles and Practice of Wave Guides, 1947, in addition to a number of scientific papers in his field.

His particular interests include state wide schemes for co-ordination of higher education, university administrative structure, national co-ordination of scientific research, and discussions with scientists engaged in research in his field.

*J. H. Hyde*

Dear Mr. Flexner,

I see with interest that you have engaged for your new Institute of advanced studies, Einstein, and wish to offer you my congratulations on this important fact.

When you have time, write me and give me news of your Institute.

With kind regards to you and Mrs. Flexner, believe me,

Yours always,

*J. H. Hyde*

Abraham Flexner Esq.,  
150 East, 72nd Street  
NEW YORK

October 31, 1932

Dear Mr. Hyde:

How good of you to write me so warmly in reference to the first steps I have taken in organizing the new Institute for Advanced Study! We are fortunate in enlisting the coöperation of Professor Einstein, and we have now also secured Professor Veblen, head of the Princeton school of mathematics and one of the most distinguished mathematicians in America.

There is little to be said about the future, inasmuch as we are feeling our way from point to point, being extremely careful to live within our income and to invest our funds in brains rather than in bricks and mortar. When we have got together a faculty in mathematics comparable to that of Paris or Rome - a thing which does not exist in America today - we shall proceed to some other subject, perhaps economics, but I am under no pressure to act promptly, and I shall do nothing that will not add to the dignity, security, and comfort of the academic profession in the United States.

I shall let you know when I come to Europe again.

Mrs. Flexner joins me in warmest regards to you and your family.

Ever sincerely,

Mr. James H. Hyde

October 5th 1943.

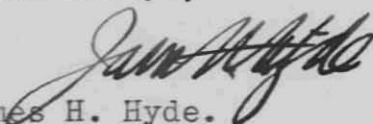

Dear Professor Aydelotte:

I am sorry that you cannot come  
to my luncheon but quite understand.

I shall be very pleased to come  
and have tea with you if I can come early.  
Is half past four too early? If not, I  
should prefer it, otherwise I will come  
at five.

With compliments to Mrs. Aydelotte

Yours always,

  
James H. Hyde.

Professor Frank Aydelotte,  
The Institute for Advanced Study  
Princeton, New Jersey.

October 4, 1943

Dear Mr. Hyde:

I am deeply disappointed to say that a longstanding engagement makes it impossible for me to accept your kind invitation for the luncheon in honor of President Dodds on Monday, November 1st. It so happens that this is the day set for the monthly luncheon of the faculty of the Institute for Advanced Study, at which I have to preside.

Is there any chance that you would be able to come out to the Institute for tea that afternoon? If so, we should be delighted to have you.

Yours sincerely,

Frank Aydelotte

April 5, 1941

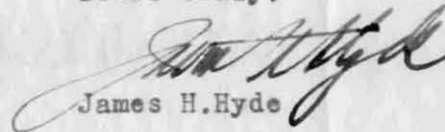

The Savoy Plaza

New York

Dear Madam,

Thank you for your letter of April 4 and  
for the Bulletin No 6 of the Institute for Advanced  
Studies. I would be very glad if you would send me any  
number when they appear.

Yours truly,

  
James H. Hyde

Mrs. Marie C. Eichelser  
Assistant Secretary  
The Institute for Advanced Study  
Princeton

April 4, 1941

James H. Hyde, Esq.  
Hotel Savoy Plaza  
5th Avenue & 59th Street  
New York City

My dear Mr. Hyde:

At the suggestion of Mr. Harrison M. Thomas, I am sending you herewith a copy of Bulletin No. 6 of the Institute for Advanced Study, which, I understand, is the one copy you lack to give you a complete set of the bulletins issued to date by the Institute.

If you would be interested in receiving new numbers of the bulletin as they are issued I will be glad to put your name on our mailing list.

Very truly yours,

Assistant Secretary

April 4, 1941

Dear Mr. Thomas:

I am sending you herewith a complete set of the bulletins issued to date by the Institute. If Mr. Hyde is interested in the work of the Institute it seems too bad to ask him to return your copy of the No. 4 bulletin, and I hope you will be willing to accept in its place the one enclosed. This is a copy which was returned to us by the Princeton University Library, it being a duplicate for which they have no use.

I have sent Mr. Hyde a copy of Bulletin No. 6.

Yours sincerely,

MARIE C. EICHELSEER

Mr. Harrison M. Thomas, President  
Princeton Bank & Trust Company  
Princeton, New Jersey

MRS. EDWARD HYMES

420 WEST END AVENUE

NEW YORK CITY

January 12th, 1939.

My dear Dr. Flemer, Pursuant to our  
conversation at Mrs. Fuld's yesterday  
I am enclosing a list of the books  
mentioned. It is possible that some  
of them might possess historic value  
to some one at the University. If so,  
I should be glad to send them.

Very sincerely yours,  
Carrie H. Hymes.

MRS. EDWARD HYMES

420 WEST END AVENUE

NEW YORK CITY

February 10th.  
Dear Dr. Flexner,

'Thank you for your deeply appreciative note of February 7th. I had already seen your letter to my aunt. The first thing that Mrs. Fuld said to me at the hospital on the very day of her accident was, "Did Cecilia show you a letter from Dr. Flexner?" She has been remarkably brave and it is tragic that she must suffer so much. Knowing that Miss Baumberger is telephoning you the latest news

this evening I shall not say more

A few of those books had to be bound and I shall send them all when these are ready next week. I fear that some are far from their pristine state.

It was kind of you to suggest that I be given due credit for the gift, but this is really not necessary as the gift is so trifling. I regret that I can not make a contribution commensurate with my interest in the Institute.

With best wishes

Sincerely yours,  
Carrie H. Hymes

February 7, 1939

Dear Mrs. Hymes:

I have been apparently dilatory in replying to your kind letter of January 12, but as a matter of fact the mathematicians were away from Princeton until January 17 and on returning to Princeton they became so busy that I had no chance whatsoever to consult them. When I did consult Professor von Neumann he mislaid your letter. He telephoned me yesterday, however, saying that he had recovered the letter and would regard your books as a valuable gift to the Institute.

As I had not seen you, I at once wrote Mrs. Fuld, asking her to convey the message to you in case she saw you, but I do not regard this as a substitute for the letter of thanks and appreciation which I am now writing.

When you send the books send them at our expense, and we shall see of it that they form a memorial to your interest in the Institute.

With all good wishes and deep appreciation,

Sincerely yours,

Mrs. Edward Hymes  
420 West End Avenue  
New York City
